

DUBAI COLLEGE
A tradition of quality in education

Teacher of Physics

Required for September 2018

Vacancy Information

Teacher of Physics

The Post

The College is seeking to appoint a lively, enthusiastic and highly committed Teacher of Physics to this thriving and successful department. As a teacher at Dubai College you will be expected to monitor, assess and evaluate the learning which is taking place and then report the findings to students and parents and adapt your teaching accordingly. You will also take responsibility for your own professional development and actively seek out opportunities in order to contribute to your own professional growth with support from the College. Finally you will also recognise that your role extends far beyond the classroom: you will be expected to be a form tutor to an assigned group of students, contribute to the school's PSHE programme through Enrichment Days, tutor time and class assemblies, as well as lead at least one extra-curricular activity per week and participate in one whole-school event in an evening or on a weekend at least once per term.

All applicants must:

have a good honours degree in Physics, with appropriate qualifications for teaching the subject to A2 Level

have Qualified Teacher Status and a minimum of two-years teaching experience post qualification

have experience of teaching A Level and GCSE Physics in a British curriculum school

be able to work as a member of a team and contribute to the further development of the department

In addition the successful candidate will:

be expected to teach Physics throughout Key Stages 3 to 5 and be able to stretch the most able students and support all students

be able to demonstrate excellent skills in classroom practice using a wide range of teaching and learning strategies

be an enthusiastic, creative and innovative teacher with a genuine love of the subject, who can motivate and inspire students using a wide range of teaching strategies

be fully aware of Assessment for Learning and include AFL as an integral part of classroom practice

be able to work as a member of a team and to contribute to the further development of the department

be committed to his/her own professional development, and in particular to the use of ICT as a tool for teaching and learning

involve himself / herself fully in the College's extra-curricular programme where applicable

The Department

The Physics Department plays an essential role in the life of the school and future careers in science are highly respected and desired by students and parents alike. Every year a number of students successfully apply for Physics or Engineering related degrees at universities including Oxford, Cambridge, Imperial, UCL, Edinburgh, Columbia, MIT and Cornell. The department consists of four full time teachers in addition to the Head of Physics along with a qualified and experienced technician. Facilities are exceptional with the Science Department occupying its own newly renovated block of twenty one full sized laboratories, five prep rooms, a food technology lab, a computer/data logging lab, an optics lab and several ancillary rooms. The department is extremely well equipped with practical teaching being the norm. The Science Department plays a key role in the extra-curricular activities programme and runs an environmental club, F1 in Schools teams, science weeks and an overseas trips to Space Camp Brussels.

The Physics Department has an outstanding record of achievement in public examinations with over 80% of students achieving A*/A grades at GCSE and around 70% of students achieving A*/A grades at A Level in recent years. The department is a very effective one, providing a stimulating and successful grounding in Physics. In Years 7 and 8, students are taught in their form groups with a single science teacher teaching the whole KS3 specification. From Year 9 onwards, students embark on their GCSE course (Edexcel 1PH0) and are grouped

Teacher of Physics

in sets based upon their academic ability. In Years 10 and 11 the students receive two lessons per week in each science. In Years 9 to 11 the subjects are taught by specialist teachers and a practical and investigative approach is used whenever possible. In Year 12 and 13 Physics is the second most popular subject in the school after Mathematics: currently five classes run in both Year 12 and Year 13 with a maximum class size of fifteen students. At A Level we follow the Edexcel Advanced GCE in Physics course (9PH0) and subject material is delivered to each class by two teachers who both have three lessons per week.

Dubai College is placing increased emphasis on outstanding teaching and learning, which includes the integration of digital skills into the classroom where appropriate. As such the successful applicant will be committed to lifelong learning, collaboration and innovation sprinkled with a generous helping of positivity.

The College

Dubai College was established forty years ago and has a national and international reputation as a world class learning organisation. We are an independent, coeducational, not-for-profit, selective school following an adapted English National Curriculum and our vision is “to be the best British School Overseas in the world, underpinned by four pillars of sporting, creative, philanthropic and academic endeavour”. This modest ambition is built on a strategy which keeps learning first. As a consequence, we have a generous CPD budget which is used to create and support continuous learning opportunities for staff. The recent appointment of a newly created Deputy Head: Learning and Teaching keeps our core focus at the heart of the school. Supported by Specialist Leaders in Education who mentor and support staff in digital skills, the Harkness method, innovative pedagogies and Dubai College Online, teaching staff are encouraged to undertake action research projects and apply for part-time Masters degrees in education-related fields. Working collaboratively within departments during INSET days as well as increasingly reaching out

across a network of other not-for-profit British schools in Dubai the College is continually striving to create systems for the sharing and creation of knowledge and learning. Whilst we do place an emphasis on academic rigour, in the true spirit of independent schools we champion the importance of the flourishing extra-curricular programme to which all staff contribute. Classes are small and the facilities, resources and teaching environment are very high quality. It is therefore no surprise that the College has developed a very strong regional and international reputation for Drama, Music and Sport. We are a member of HMC, COBIS (Council of British International Schools) and BSME (British Schools of the Middle East).

The British Schools Overseas inspection of the College (conducted in January 2016) classified the school as ‘Outstanding’ stating ‘It represents the very best of British education whilst, at the same time, respecting and celebrating the local culture in Dubai’. The key strengths of the school were identified as the progress and attainment of the students; the teaching, learning and assessment; the curriculum; relationships across the school and sense of community; personal development of the students and leadership across the school. The number of students on roll is currently 920 and comprises students in the 11 to 18 age range with more than 250 in the Sixth Form. The College operates an eight form intake of 160 students in Year 7. Approximately 55% of the students are British, but over forty additional nationalities are represented. The GCSE and A Level courses followed are those of one of three examination boards (Edexcel, AQA, and OCR). Examination results are consistently outstanding and in 2017 Dubai College’s GCSE performance was comparable to the 12th best UK co-educational independent school according to The Times Parent Power Independent Schools League Table. Our excellent A Level results mean that up to 28% of Dubai College leavers now go on to study at the top 1% of universities worldwide (according to The Times Global Reputation Rankings) and we are yet again the top performing school in the United Arab Emirates achieving 85% A*/A grades at GCSE and 60% A*/A grades at A Level this year.

Teacher of Physics

The College occupies a nineteen-acre site on the coast very close to The Palm at the mid-point between Dubai Marina and the iconic Burj Al Arab. Over the years excellent facilities have been developed and all teaching rooms will soon have generic LCD screens which allow students and staff to project their devices to the class. We have a multi-purpose auditorium which is capable of seating over 1000, the Sixth Form centre underwent significant expansion and redevelopment in 2014 and this year we have opened a new flagship English department which serves as a statement of intent for future renovation, as well as a new reception and administration building which will create the space for our regional teaching and learning hub. A new sports pavilion was completed in 2015 and we are fortunate enough to have our grass playing fields and other sports facilities located on site.

Ethos

As College we are aiming to engineer balance in the lives of students who are academically very gifted. There is no blueprint for a Dubai College student rather we are aiming for students to discover for themselves who they are and who they want to be. By creating a wealth of opportunities for students to participate in as broad a range of experiences as possible whether they are sporting, creative, philanthropic or academic, we are enabling them to discover their own place within the school community and in time within the world outside. We never lose sight of the fact that our academically gifted students aspire to perform as well as possible in public examinations and we continuously champion the academic. However, the ability to work as a member of a team, to manage setbacks and failure and to recognise personal strengths and weaknesses will be as important in enabling them to live their life with integrity and is consequently a core focus of what we do here. As a result our students leave us as confident individuals with the knowledge, skill set and outlook to succeed at the very best universities and eventually in their chosen, often very challenging, career paths. When asked what standards we expect of one another as professionals DC staff demonstrate a real sense of vocation, that working at Dubai College is not a job

but a lifestyle choice. Teachers believe strongly that they should be able to fulfil their academic responsibilities to their students and must be accountable for the outcomes of every one of their students. The next most important expectation of staff at Dubai College is that they should embrace whole school life and contribute fully to the extra-curricular programme both during and after school hours.

Working at Dubai College is intense; it is not a 9-5 job and for it to continue to feel like a real community staff must be willing to give freely of their time in exchange for working with very able students. Staff believe they should also display excellent professional courtesy to one another and their students: every subject is on the timetable for a reason and no-one should speak out of turn about somebody else's academic discipline; we work in an Islamic country and staff should dress professionally in line with cultural sensitivities and staff should treat one another and their students as they would hope to be treated themselves. Staff also feel that they each have a responsibility to go beyond the baseline: the national curriculum is a jumping off point not an end goal, an exam syllabus is a dot to be joined up to a bigger picture, the working day is the start but not the end of a day's work, an ALPS prediction is a minimum for a student to achieve. As practitioners staff feel they should be looking to develop, to enthuse, to inspire, they should be craftsmen with a passion for their subject and whatever their position in the school they feel they all ought to feel equally responsible for the outcomes of the College. As members of a school which feels more like an extended family than an institution we hope to educate well-mannered citizens who are empowered to fulfil their aspirations. The "not-for-profit" structure of our organisation perfectly embodies our ethos: everything is invested in the school and the students with nothing left over.

While this all sounds ideal it is important to understand, however, that Dubai College is not perfect. The post itself is an extremely challenging one and the College is tremendously busy. If you dislike hard work – sacrificing

Teacher of Physics

many weekends and evenings for the sake of the students – and are concerned by working with highly able, intellectually demanding students, this post is simply not for you. Equally it must be clearly understood that the College is passing through a significant period of change and we are in a new phase of the College's development cycle. We are updating our learning approaches, facilities, policies, curriculum and IT capability. The successful applicant must both embrace and play their significant part in contributing to this change but without damaging, in any way, the core essential ethos of the school. It should be noted that, although we certainly embrace change, we do not run with every innovation emanating from the UK – we cherry-pick initiatives that suit our selective and highly able student body. However, it should also be noted that we are subject to whatever changes the UAE government chooses to make on an annual basis which can make for a very fast-paced educational landscape.

The College really does have a great feel about it. It already has an exceptionally strong national and international reputation and if you feel you have the potential to build on our reputation as centre of excellence on the global stage we would very much like to hear from you.

Remuneration

Dubai College offers an excellent remuneration package and the opportunity to work with our dynamic, highly qualified team in very pleasant surroundings with excellent facilities. The package will be discussed at interview.

How to apply

Applications should be sent by email to headassist@dubaicollege.org using the application form available on our website. The deadline for applications is Monday 26th February with interviews planned for Thursday 1st to Monday 5th March 2018. For further details about the College please visit our website - www.dubaicollege.org.

Dubai College is committed to safeguarding and promoting the welfare of young people and operates child protection screening which includes checks with previous employers and Disclosure & Barring checks
