

### **Teacher of Science - MPS**

We are seeking an outstanding practitioner to join our department of ten other teachers and two technicians who work as a close, mutually supportive team. As a high performing school innovation is encouraged and opportunities for extensive personal professional development are available.

The Science Faculty is housed in a modern block that includes three new science labs, opened in September 2017. Electronic interactive whiteboards are present in all of the laboratories.

At KS3 all students study science for three periods each week. At KS4 all pupils follow a range of suitable ability courses including AQA Trilogy Combined Science and AQA separate sciences.

## **Teacher of Science - MPS**

### **Person Specification**
