High School

PSHEE Department Information

The PSHEE department at Northgate is motivated, versatile and enthusiastic. We inspire debate, creativity and aspirational thinking so we are looking for a colleague with the skills to enhance this dynamic group of teachers and encourage our students to think beyond their academic studies. Furthermore, we are seeking a colleague who can ensure PSHEE lessons are engaging and capture our students' imaginations.

Our PSHEE schemes of work focus on the needs of the students in each given age group. SRE is taught both through the PSHEE programme and in Science lessons. In Year 7 and 8 students have one PSHEE lesson per week, whilst higher up the school students gain their PSHEE input on rotation with other subjects such as RE and Careers.

PSHEE is a vital and energetic subject at Northgate and we cover a broad spectrum of topics including really complex and personal subject matters such as diversity, relationships and crime. Within PSHEE, teachers help students tackle these multifaceted issues in a safe and accepting environment. We encourage students to read around the subject, discuss issues amongst themselves and involve parents.

Visiting speakers are invited into lessons, and to deliver bigger year groups events. Students are encouraged to become involved across a wide range of subject areas both in the classroom and outside, from supporting charities to devising new and innovative approaches to modern world issues such as climate change, recycling and mental health.

Our PSHEE schemes of work have recently undergone changes to meet the new guidelines and the successful applicant would be invited to contribute their ideas in order to develop this subject further.
