Bishopshalt is a school with a rich history with a beautiful Grade 2 listed building. It is now a stand-alone academy in the London Borough of Hillingdon that provides education to a truly comprehensive student body. Bishopshalt has a proud tradition of serving the local community, having been established as a school in 1907. At first the school was Grammar which changed to Comprehensive status and then a school with Performing Arts college status. Whilst specialisms are no longer recognised the school has maintained its traditional ethos, continuing to build upon its strengths and weaving them into the fabric of the institution.

There is a strong house system, with house names inspired by the history of the school. The house system is an area of the school that is growing rapidly.

The school is significantly oversubscribed. We have over 300 first choice applications each year for 186 places, which demonstrates the popularity, high esteem and confidence the local community has for Bishopshalt. Our students, and our staff love our school.

The Mathematics department at Bishopshalt strives to provide students with encouragement, confidence, enjoyment and challenge in learning mathematics irrespective of prior attainment. We start every lesson by recalling prior knowledge to improve the retention of key skills in Mathematics. New content is introduced in a carefully sequenced framework, explicitly linking to prior knowledge and real life applications. This is reinforced by plenty of practice to develop procedural fluency. We ensure the conceptual understanding is firmly established before moving on to problem solving in Mathematics. This thorough and logical approach helps the students to develop a greater understanding and love for Mathematics.

Year 7 begins with a recap of Key Stage 2 number skills embedding fluency with the core skills required for Mathematics. The four operations of Maths can be seen widely amongst all topics, these are core skills which follow through to Algebra, Number, Geometry and Statistics & Probability. The basics of each of these topics are the fundamental skills which students master in Key Stage 3 and later go on to explore and develop in Key Stage 4 and Key Stage 5.

At Key Stage 4, students are following on from Key Stage 3 content which allows them to extend their learning further in a problem solving and reasoning manner. Students will have encountered both problem solving and reasoning style questions but will now see them where multiple higher order skills are required and used in a particular sequence in order to arrive at a solution.

Students get the opportunity to revisit all five strands each year enabling them to interleave their knowledge of each different strand to see how mathematics is one continuous beautiful subject. Revising each strand and topics of the curriculum gives students scope to deepen their understanding of each topic through reasoning, problem solving, fluency and mastery throughout all key stages.

The Key Stage 5 curriculum is designed to develop and broaden students' experience of Mathematics at a higher level. Our curriculum follows one of a similar to our Key Stage 3 and 4, introducing new content, developing it each term and developing mastery within the subject. Beginning Year 12 with Pure allows students to recap and develop their knowledge of many topics from the GCSE content which they will apply throughout Year 12 and 13. Students will deepen their knowledge of Algebra and Geometry in Pure Mathematics, whilst learning new areas such as Calculus and Mathematical proof which they will later develop in Year 13.

The applied content will also allow students to interleave their pure knowledge with mechanics and statistics, showing how they would model a situation and apply this to everyday real life concepts.
