### Mathematics Teacher (February 2026)

**Newton College** is a prestigious and innovative IB school, which delivers the three IB academic programmes – PYP, MYP and DP - in both English and Spanish to pupils aged 2 to 18. We have outstanding facilities in our Lima campus and a unique study centre in the Peruvian Amazon Rainforest ([www.newton.edu.pe](http://www.newton.edu.pe)).

We offer a broad and balanced curriculum with 34 different courses at DP level. All our pupils learn to play a musical instrument from the age of 5 and the wide range of additional sports activities reinforces our Physical and Health Education programme. The Model United Nations Club, the Debate Club and dance are other successful extracurricular activities.

Our pedagogical coaches support teachers with classroom practice and our Psychopedagogy department offers emotional and cognitive support to our students. We constantly foster our school values – respect, integrity, commitment and empathy – the IB Learner Profile, the IB Approaches to Learning skills and education for sustainable development.

We are members of GAIL, Global Alliance for Innovative Learning ([www.gailschools.org](http://www.gailschools.org)), LAHC, Latin American Heads Conference ([www.lahc.net](http://www.lahc.net)), BSP British Schools of Peru, and of ADCA, an association of private bilingual schools in Lima. Our expatriate staff are mostly from the UK, USA, Canada and Australasia.

Our graduates continue their studies in the best universities in Peru and throughout the world. Our former student, Kerstin Forsberg, was named one of Fortune Magazine's 50 Greatest World Leaders in 2019 (<http://fortune.com/worlds-greatest-leaders/>).

For February 2026, we are looking for a dynamic Mathematics teacher committed to the holistic growth of students. In Years 6-10, the MYP Mathematics course is delivered: in Years 11 and 12 the IBDP Mathematics course is delivered. The appointee for this post will teach a mix of the IBDP Maths course in Years 11 and 12 and some MYP Maths in other year groups.

Interested candidates must fulfil the following requirements:

### **Post Profile**

- Hold a teaching degree in Mathematics or related subject;
- Have experience of teaching the IB Middle Years and/or Diploma Mathematics Applications and Interpretation;
- Demonstrate expert classroom practice that promotes inquiry-based learning;
- Command a wide range of digital tools for teaching, communicating and data collecting;
- Possess excellent communication skills, spoken and written;
- Possess excellent interpersonal and collaboration skills;
- Demonstrate a growth mind-set and positive drive.

### **Contract**

- An initial two-year contract with flights to and from country of origin for appointee and close family;
- A salary paid in American dollars which is highly competitive for Latin America;
- Baggage, settling-in and Spanish tuition allowances;
- Private medical insurance for self and close family;
- Remission on school fees for children enrolled at our school;
- Excellent internal and external professional development;
- A very collaborative and collegial work climate.

Applicants should send their resumes to the email address [recruitment@newton.edu.pe](mailto:recruitment@newton.edu.pe), indicating in the subject box of the email the title of the post for which they are applying. The names of three referees must be provided, including the current employer.

We are a safe recruitment organization and shortlisted candidates will need to produce a police clearance certificate for every country in which they have worked.
