

## Trinity Academy's new building

Construction work on the permanent home for Trinity Academy has been underway since November 2019 and the £25million construction project is starting to take shape.

We have been ambitious in the design phase to ensure that the building reflects our vision and aspirations. In line with the music specialism, the site includes a performing arts centre with a large concert hall seating up to 570 people and an adjoining atrium space, drama and dance studios, extensive music classrooms and smaller music practice rooms. The building also includes an indoor sports hall as well as bespoke classrooms for art, textiles, design technology and food technology, science laboratories, general classrooms for English, maths, languages and humanities, a large library, sixth form study and social areas, a special educational needs centre and a large canteen area. Externally the site encompasses an outside amphitheatre area, 3G sports pitch, and multi-use games area.

Further information on the building, including 3D flythrough videos, can be found on the website here: [www.trinityacademybristol.org/the-new-building/](http://www.trinityacademybristol.org/the-new-building/)
