

When clicking on the form online, depending on the default settings:

- a. Some PCs default to opening the pdf in a browser window - the form will need to be downloaded and saved (see below).
- b. Some PCs default to opening in a pdf reader eg 'adobe acrobat reader' – the form will just need to be saved.

It may mean your form is incomplete if you try to fill in the form without downloading and saving it first when it opens it in a browser (a).
