

Maths Department at Durrington High School

Durrington High School has a super Mathematics department staffed by an innovative and experienced team. We have a shared ethos within the department that has enabled us to achieve excellent examination results for the past 8 years. We are continually striving to improve, and endeavour to ensure that every student is provided with an outstanding learning environment that allows them to achieve their best.

Our exam outcomes remain considerably above national averages. In 2021 62% of students achieved grade 5 or above at GCSE and 28% grade 7 or above. The highest achieving students also took Further Mathematics at GCSE, with 57% achieving grade 7 or above. We are a large department currently consisting of 11 full time teachers, 2 part time teachers and two TAs who work solely within the department. Every class room also has an interactive smartboard. With year groups of 330, this makes our outcomes even more special.

We are looking for an enthusiastic and committed teacher who sets themselves and our students' high expectations. The successful candidate will be an excellent teacher who is dedicated to delivering high quality lessons and is prepared to commit themselves to the role completely. This is not a department where you can rest on your laurels; we have extremely high expectations and expect every teacher to make a contribution to our on-going success. As a research school, you will work with a department makes the most of evidence informed teaching and uses teaching for mastery as a focus at all times.

In return you will find us a very supportive and warm team, with a range of experiences and teaching styles but also receptive to new ideas. You will be fully supported by a focused and proactive team who thrive on sharing ideas and resources whilst working to a fully interactive Scheme of Work that every member of staff follows and contributes to, this includes numerous resources and structured homework tasks.

If you are an enthusiastic, hardworking, conscientious and energetic teacher who not only values young people but can motivate and inspire them across the age and ability range then we would like to hear from you.

Shane Borrett
Director of Mathematics
