WEST LONDON ACADEMY
PROUD TO LEARN

The academy is a friendly, happy and welcoming place where young people are enabled to make excellent academic progress and develop the knowledge, skills, qualities and values required to lead successful and fulfilling adult lives. As a multicultural mixed all-through school, we are uniquely placed to care for each child as an individual, right through their Primary and Secondary education.

ICT Department is a highly respected and fully established part of the academy. The IT department has the state of the art facilities with each teacher in the department teaching in a dedicated IT room with a suite of computers (one per student), an interactive whiteboard, colour printer, scanner and digital visualiser. There are both ethernet and wireless networks throughout the Academy. The department is well resourced, supported and plays an active role towards the centre of the school community.

We have a 3 year Key Stage 4 programme in the Academy whereby students start their GCSE Computer Science and Cambridge Technical Diploma subjects in Year 9. ICT is also an important aspect of the curriculum at Post-16 with A-Level Computer Science and BTECs offered.

A notable feature of the department is its strong ethos and team spirit. Resources are regularly developed and innovation is encouraged and valued. ICT staff also regularly participates in, and lead, collaborative projects across the Academy.
