

ABOUT JET INTERNATIONAL SCHOOL

Conceived as a place where students learn about the world around them in *a creative and modern way*, **Jet International School** is an inspiring environment for ambitious young people who strive towards high academic goals. In the modern world, which is constantly changing, it is necessary to keep up with the times and continuously adopt new knowledge. That is the very reason why we decided to merge global trends teaching methodology, information technology and curriculum design.

By recognising and developing talents, fostering multidisciplinary knowledge, raising the level of culture and honing social skills, our school is given an advantage where the choice of secondary education is concerned. Not only is our teaching methodology contemporary but also our teachers, who, with a modern mindset, use mentoring to develop students' intrinsic motivation and their need to advance through new knowledge.

Our modern building in the Southwest of Ulaanbaatar is equipped with state-of-the-art teaching tools and interactive whiteboards. Spacious classrooms, an amphitheatre, a learning centre, and a recreation room provide students with a stimulating environment for an all-day stay. In the four years ahead, education at Jet International School will be an exciting journey filled with exploration, friendship and fun. At this school, the students do not study because they have to, but because they want to!

This is why **Jet International School** is the right place for upper grades of primary and secondary education. This is a school where we learn, make friends, grow and evolve, a school where we cherish differences, where we know that work is what brings success, and that friendships mean investing in the future.

MISSION AND VISION

Quality education and our students' progression is the best confirmation of our success. This is why **Jet International School** primary motivation and mission is to help its students' become citizens of the world whose knowledge, ideas and actions will make them successful people and role models for future generations.

Quality education as the key to success gives us the ability to properly perceive the world around us, to make the right decisions and to use our opportunities in the best possible way. This is why our mission is to give our students strength and wisdom to change the world for the better through their decisions.

Having a vision that our school is a place where new ideas are born, talents nourished and knowledge improved, we would like to encourage our students and parents to join us in our common efforts and share with us the joy of success.

VALUE WE CHERISH

Students come to our school not because they have to, but because they want to, which is of paramount importance to us. This is why we try to furnish this environment with conditions for learning and socialising which reflect the values that we cherish.

Although modern when it comes to teaching methodology and use of technology, our high school has remained true to traditional moral values. At our school, all students are equal, regardless of sex, financial status, nationality or religion, and we pay special attention to respecting human rights and nourishing friendship.

We hold that it is a great value to be just, fair and truthful, because that is the way to build a responsible relationship toward oneself and others. Developing the awareness of self, our students develop self-initiative, capability of making a self-assessment and expressing one's own opinion. We encourage them to build their opinions, beliefs and value system through cultivation of personal and national integrity, but we also encourage openness to multiculturalism and preserving the world's cultural heritage.

Jet International School is healthy environment in ecological as well as ethical sense. We encourage our students to develop and practice healthy lifestyles, the awareness of the importance of one's health and safety, as well as need for nurturing and developing one's physical abilities. It is important to us that our students accept healthy habits, to become environmentally aware, and to contribute to protection and preservation of nature and environment through responsible actions.

We see our students in the future as citizens of the world: educated, modern, successful and, above all, responsible. And that is the way our school makes them.

CAMBRIDGE GLOBAL PERSPECTIVE SCHOOL

Along with being an incomparably modern Cambridge secondary school in Mongolia, we are proud to also be one of the few Cambridges Global Perspectives schools in the region. What this means is that our students have the opportunity to take Global Perspectives, a unique and interdisciplinary Cambridge subject.

To put things in a wider perspective, the education that we offer is a result of our unique, innovative and creative approach which, among other things, qualifies us as a Cambridge Global Perspectives School.

DEVELOPING CRITICAL THINKING AND PROBLEM-SOLVING SKILLS

Working in the Global Perspectives programme, students acquire knowledge and skills in various subjects and learn how to combine those interdisciplinary competencies in order to successfully handle and solve concrete tasks in real-life situations. They are set to explore and learn about contemporary global issues that interest them.

They will conduct their own research, draw conclusions and explore their own perspectives, convictions and frame of mind. The knowledge they gain throughout those processes is both modern and of a highly practical nature.

Here's an example of what that looks like: to solve a specific task, students may have to combine their knowledge of chemistry, biology and geography. On a different occasion, they may have to tap into what they have learned in subjects like history, international relations and economics.

That is precisely what the Global Perspective programme will teach them – to acquire and combine competencies across the board i.e., in different fields and implement them in order to solve specific tasks and situations. It is those abilities that guarantee success in higher education, whether it be in Mongolia or abroad.

SUCCEED IN EVERY WAY – WITH THESE SKILLS

This innovative and stimulating approach sets academic study into an applicable and real-world context. Along with enabling students to cultivate problem-solving skills, independent and critical thinking, this programme allows them to develop the research, communication and collaboration skills needed for success both in their further education and careers.

If we consider the two most-often criticised features of Mongolian education system, those being the inapplicability of theoretical knowledge and the incompatibility between the demands of the job market and the skills with which students graduate, it is clear that the Global Perspectives programme provides students with an immense advantage over their peers at other schools.

Jet International School has filtered out all such flaws through its interdisciplinary approach and the Global Perspectives programme, making sure that the knowledge imparted is highly practical and that students are provided with a competitive advantage.

By opting for the Cambridge Global Perspectives subject students are given the best possible opportunity to not only receive excellent marks in all of their subjects but to continue their academic pursuit and growth with a bright outlook for a successful career in the future.
