

Curriculum Area: Science

We currently offer the following Level Three courses:

- Biology (AQA) - Advanced Level
- Chemistry (AQA) - Advanced Level
- Physics (AQA) - Advanced Level
- BTEC Applied Science (Pearson)

The Curriculum Area is staffed by three core staff who work collaboratively alongside a very experienced Science Technician as well as a dedicated ICT team. The curriculum area is one of the most popular in the Sixth Form with growing numbers. You will have the opportunity to continue to develop Physics within our Science offer.

In September 2008 we moved into a brand new purpose built Sixth Form facility here on the Burnley Campus. The Science area boasts five suited flexible laboratories as well as having access to smaller seminar rooms, four lecture theatres and ICT suites with networked PCs. Each laboratory has internet access with wireless laptops available, projection equipment and white boards. At the moment, three also have interactive whiteboards. There is a large, well-equipped prep room.

This is an exciting opportunity to contribute to the development of this innovative subject area within the Sixth Form,
