

Teacher of Mathematics The Green School for Boys

Dear prospective candidate,

Thank you for your interest in applying for the above post at The Green School for Boys. The Green School for Boys opened in September 2017 with 120 boys in year 7 and is one of two schools run by The Green School Trust – a Church of England Multi Academy Trust serving the young people of West London. The Trust's core purpose is to develop schools which expand the hearts and minds of students. The motto for The Green School for Boys is "reach beyond your grasp" which is an adaptation of a line from "Andrea del Sarto, a poem by Robert Browning, which reads "Ah, but a man's reach should exceed his grasp, or what's a heaven for". This serves to illustrate the ambition we have for our boys.

The Trust intends to appoint an aspirational and innovative Teacher of Mathematics who will drive standards of excellence, which will inspire and motivate boys to achieve in all aspects of school life. In 2022 our first year 11 cohort will sit their public exams and this role presents an exciting opportunity to be part of this. As a Teacher of Mathematics you will foster a culture of high expectations, achievement for all and care for each individual within a dynamic learning environment where each boy will be stretched, stimulated and supported to make excellent progress. The school has a STEAM specialism underpinned by a focus on literacy, creativity and links to industry. The school's Christian ethos and enrichment in Sports, Technology, Engineering, the Arts and Maths ensures that boys develop as well rounded, confident and compassionate young men.

This is an amazing opportunity to be a part of a relatively new school and be involved in teaching and evaluating successful mathematics in collaboration with an experienced maths department. The Trust has strong links with NCETM and there will be opportunities to take part in continued professional development with The London Central and West Maths Hub and Advanced Mathematics Support Programme. The department is committed to the concrete, pictorial and abstract approach. The department has state of the art technology as part of the new building with new and innovative interactive whiteboards in each classroom, personal visualizers and we are fully stocked with physical manipulatives such as algebra tiles, discs, double sided counters and all teachers have their own set of mini whiteboards. The department has subscriptions to both mathsbox and hegartymaths allowing teachers to set personalised home learning for students.

Staff are involved in all aspects of school life in order to lay strong foundations for the future. We value our staff and we work collaboratively to provide professional support, CPL and sharing of good practice across both The Green School for Boys and The Green School for Girls and deliver A level at The Green School Sixth Form. This is an exciting time to join the school and presents a unique opportunity to contribute to a new school in its fourth year with a highly committed and professional team who have established a strong positive ethos where every child matters.

To apply you should complete the TES application form and write a supporting statement of no more than three sides of A4 (size 11) explaining how your professional experience has prepared you for the role with reference to the person specification. If you would like further information please contact my PA Julie Hart j.hart@tgstrust.com. I very much look forward to receiving your application.

Yours sincerely,

Mrs Sally Yarrow, CEO & Executive Headteacher
