

Cornelius Vermuyden

Cornelius Vermuyden is the perfect place to take the next step in your teaching career. Whether you are just joining the teaching profession or are looking for an exciting opportunity to further your career, our commitment to continual professional development will result in a personal package of support and challenge.

Every teacher at Cornelius Vermuyden is issued with our teacher Toolkit; a revolutionary collection of resources featuring an Apple MacBook Pro laptop, a Promethean interactive slate and a visualiser. The toolkit has been developed with our ICT partners at RM to enable our teaching staff to log on to our wireless network, access cloud services at home or in school and use the very latest software to plan and deliver engaging learning experiences.

Our brand new school building was officially opened in the summer of 2012. It is an award winning purpose built school which promotes the love of learning. The light and spacious design features a range of unique learning spaces including an Immersive room, breakout spaces as well as a number of iMac suites.

You really have to see it to believe it and tours are available to support your application.

Cornelius Vermuyden originally opened in 1972 and has enjoyed an excellent reputation in our local community ever since. Our small school ethos encourages pupils to be polite and courteous while allowing us to successfully focus on personalising the curriculum to the needs of every pupil. By working with parents and carers we are able to implement a strong system of individual support and challenge which ensures the school's attainment and progress is above the national average.

The school curriculum has been developed in line with national initiatives while maintaining a commitment to our key beliefs:

- The transition from Year 6 to 7 should be made as smooth as possible
- Our curriculum is relevant and entirely inclusive

In Year 7 we organise students into pastoral tutor groups and use them to teach foundation subjects including History, Geography, Music, Drama, ICT, Art, Technology and Physical Education. In the core subjects of English, Maths and Science we teach pupils in groups determined by academic ability.
