January 2019

Dear Colleague,

Thank you for your interest in applying for the role of Second in Mathematics at The Heath School. The Heath School is a successful, oversubscribed, happy school and I am seeking to appoint someone who wants to be part of a team and can really make an impact.

The staff in the maths faculty are a supportive and considerate team and the caring ethos makes this a rewarding place to work. Since I joined the school in September 2017, I have been touched by the ways that the whole school community seek to welcome and integrate any new staff and I am fully committed to this approach myself as the Head of Mathematics. As a new member of staff you have opportunities to develop your practice through CPD and plenty of opportunities to develop your ideas on how to improve Mathematics within our faculty.

I am looking to appoint someone who can support me in the following areas, leading to the development of skills in preparation for future leadership of a department:

- Take responsibility for a key stage in Mathematics including leading on the tracking, monitoring and intervention of students within the Key Stage.
- Help with the continuing development of schemes of learning that will challenge every student and fulfil curriculum and assessment requirements.
- Monitoring the quality of learning, including planning, lesson delivery, feedback, homework, differentiation and classroom management across the faculty.

I would welcome informal visits to the school by prospective applicants. Should you wish to avail yourself of this opportunity, please contact the Principal's PA, Marie Wadsworth. In the event that you require further information regarding Mathematics at The Heath in advance of submitting your application, please do not hesitate to contact me either by calling the school or via email jonesp@heathschool.org.uk

Yours sincerely

Paul Jones
Head of Mathematics
