

Saltash.net Community School **Science Department**

This is an ambitious department which is highly collaborative and places strong emphasis on developing the best possible learning environment. In addition, the department has developed and encouraged the use of outside learning spaces such as the rural science area, extensive allotments, greenhouses, livestock area and sensory garden.

We offer a varied programme of study for all students. This includes a highly popular Separate Science suite of GCSCs alongside Combined Science GCSE and a BTEC in Animal Care. At Key stage 5, we offer A-Levels in Biology, Chemistry and Physics as well as a BTEC in Applied Science.

You would be joining a large and well-equipped department with 11 laboratories. Heads of KS5 subjects and 4 technicians all support the Head of Science and all Science staff. The department has an excellent record of its staff progressing to promoted posts within the department and the whole school.

The department has an ethos of challenging and supporting all students to achieve their full potential. The school has a very proactive continuous professional development programme with members of the department featuring strongly in many national and international teaching awards. You would be joining a leading centre of excellence in learning and teaching in Science and STEM.

Chris Henderson
