

## **Science Department**

Science is a very successful Department at Queensbury. We have a strong team of ten specialist science teachers supported by four highly experienced Technicians. The team includes specialist Key Stage 3 and 5 leaders and two Science Subject Specialist teachers who work at Queensbury as their base and with other schools in the CfBt trust to support the development of outstanding teaching and learning in Science.

Each teacher has their own well equipped teaching laboratory and the Department is well resourced.

We are currently following the Key Stage 3 curriculum for students in years 7 and 8. Students begin their GCSE science course in year 9 and most of our students are following the latest AQA Combined Science Trilogy GCSE course. Our more able students study Biology, Chemistry and Physics as three separate science GCSEs.

We have a thriving sixth form with students able to study Biology, Chemistry, Physics or Psychology at A level. We also offer the BTEC level 3 in Applied Science.

Mrs H Wheeler

Head of Science Faculty
