

The Davison Mathematics Department

At Davison, we consider our Mathematics Team to be second to none. We are a group of nine forward thinking, forward moving professionals and we are now looking for a like minded Mathematics specialist to join us and assist in leading our subject to even greater success.

With us you would be supported and encouraged to develop your teaching and leadership skills as part of your ongoing professional development. We are looking for someone who is hard working; enthusiastic; willing to work in a team and is undaunted by leading and exploring new ideas including a few of their own!

Our girls respond brilliantly to high-quality teaching and learn well in a friendly yet vibrant atmosphere. We are now very excited to welcome students at Year 7 where we hope to build on the significant progress previously achieved at KS3 thus ensuring an excellent start to their GCSE course. Class sizes vary from about 15 to 32 students depending on ability and each member of our team has a well balanced timetable.

The department is housed in eight teaching rooms, all in the same area. We have our own computer Pod, plus three sets of 16 laptops for class use and a small office for communal use. All the teaching rooms are fitted with an interactive whiteboard, we are building up an impressive collection of software and considerable emphasis is placed on the appropriate use of ICT in Mathematics teaching. We also make use of hand-held whiteboards in every classroom to strengthen the work being carried out within our "Assessment for Learning" programme.

We are happy to talk to anyone who is thinking of applying for this post so do feel free to make contact with the department or arrange for a visit.

Cindy Hunt, Leader of Mathematics.
