<b>HEALTH &amp; SAFETY HANDBOOK ACKNOWLEDGEMENT FORM .....</b>	<b>66</b>

# INTRODUCTION

This handbook contains the Health & Safety information you require to comply with our Health & Safety Policy.

If you have any queries regarding the contents please do not hesitate to ask.

South Pennine Academies takes its responsibility for Health & Safety very seriously and is committed to a programme of progressive improvement that requires input from all its employees. If you see anything during your work that gives rise to a concern you are positively encouraged to report it to your manager.

Safety is everyone's responsibility and that includes you.

# HEALTH & SAFETY POLICY STATEMENT

The management of South Pennine Academies recognises that it has a legal duty of care towards protecting the Health & Safety of its employees, students and others who may be affected by the Trust's activities.

In order to discharge its responsibilities the management of the Trust will:

- bring this Policy Statement to the attention of all employees
- carry out and regularly review risk assessments to identify proportionate and pragmatic solutions to reducing risk
- communicate and consult with our employees on matters affecting their Health & Safety
- comply fully with all relevant legal requirements, codes of practice and regulations at International, National and Local levels
- eliminate risks to Health & Safety, where possible, through selection and design of materials, buildings, facilities, equipment and processes
- encourage staff to identify and report hazards so that we can all contribute towards improving safety
- ensure that emergency procedures are in place at all locations for dealing with Health & Safety issues
- maintain our premises, provide and maintain safe plant and equipment
- only engage contractors who are able to demonstrate due regard to health & safety matters
- provide adequate resources to control the Health & Safety risks arising from our work activities
- provide adequate training and ensure that all employees are competent to do their tasks
- provide an organisational structure that defines the responsibilities for Health & Safety
- provide information, instruction and supervision for employees
- regularly monitor performance and revise policies and procedures to pursue a programme of continuous improvement.
- Appoint the Principal as responsible person

This Health & Safety Policy will be reviewed at least annually and revised as necessary to reflect changes to the Trust activities and any changes to legislation. Any changes to the policy will be brought to the attention of all employees.

**Signed:**

**Dated: 1<sup>st</sup> September 2021**

**Principal: Samantha Gallant**

**Signed:**

**Dated: 1<sup>st</sup> September 2021**

**Chair of Governors: Leigh Blanchard**

# RESPONSIBILITIES AND RULES

The Governors, Principal, Senior Staff and Designated Health & Safety staff will take all reasonable steps to identify and reduce hazards to a minimum. To assist in this all staff and students must be aware of their own and others personal safety, and in any of the academy activities, both on and off site.

## **Employees**

All employees must:

- take reasonable care of their own safety
- take reasonable care of the safety of others affected by their actions
- observe the safety rules
- comply with the Health & Safety Policy
- conform to all written or verbal instructions given to them to ensure their personal safety and the safety of others
- dress sensibly and safely for their particular working environment or occupation
- conduct themselves in an orderly manner in the work place and refrain from any antics or pranks
- use all safety equipment and/or protective clothing as directed
- avoid any improvisations of any form which could create an unnecessary risk to their personal safety and the safety of others
- maintain all equipment in good condition and report defects to their supervisor
- report any safety hazard or malfunction of any item of plant or equipment to their supervisor
- report all accidents to their supervisor whether an injury is sustained or not
- attend as requested any Health & Safety training course
- observe all laid down procedures for processes, materials and substances used
- observe the fire evacuation procedure and the position of all fire equipment and fire exit routes.

## **Students**

All students must:

- co-operate with Teachers and Trust staff on Health & Safety matters;
- not interfere with anything provided to safeguard their own Health & Safety;
- adhere to any hazard/warning signs, notices and rules;
- take reasonable care of their own Health & Safety; and
- report all Health & Safety concerns to a Teacher

# HEALTH & SAFETY RULES

## **General**

- It is the duty of all employees to co-operate with the Board of Trustees in fulfilling our legal obligations in relation to Health & Safety.
- Employees must not intentionally or recklessly interfere with anything provided in the interests of health, safety or welfare.
- Employees are required to notify to management of any unsafe activity, item or situation.

## **Working Practices**

- Employees must not operate any item of plant or equipment unless they have been trained and authorised.
- Employees must make full and proper use of all equipment guarding.
- Employees must not clean any moving item of plant or equipment.
- Employees must not make any repairs or carry out maintenance work of any description unless authorised to do so.
- Employees must use all substances, chemicals, liquids etc, in accordance with all written instructions.
- Employees must not smoke except in prescribed areas.

## **Hazard/Warning Signs and Notices**

- Employees, visitors and students must comply with all hazard/warning signs and notices displayed on the premises.

## **Working Conditions/Environment**

- Employees must make proper use of all equipment and facilities provided to control working conditions/environment.
- Employees must keep stairways, corridors, classrooms and work areas clear and in a clean and tidy condition.
- Employees must dispose of all rubbish, scrap and waste materials using the facilities provided.
- Employees must clear up any spillage or liquids in the prescribed manner.
- Employees must deposit all waste materials and substances at the correct disposal points and in the prescribed manner.

## **Protective Clothing and Equipment**

- Employees must use all items of protective clothing/equipment provided as instructed.
- Employees must store and maintain protective clothing/equipment in the approved manner.

- Employees must report any damage, loss, fault or unsuitability of protective clothing/equipment to their supervisor.

### **Fire Precautions**

- Employees, visitors and students must comply with all laid down emergency procedures.
- Employees must not obstruct any fire escape route, fire equipment or fire doors.
- Employees must not misuse any fire fighting equipment provided.
- Employees must report any use of fire fighting equipment to their supervisor.

### **Accidents**

- Employees must seek medical treatment for work related injuries they receive by contacting a designated First Aider. Upon returning from treatment they must report the incident to their Manager.
- Employees must ensure that any accident or injury treatment is properly recorded in the Helpline section (Accident Book) on the Ellis Whittam H&S portal.
- Employees must notify management of any incident in which damage is caused to property.

### **Health**

- Employees must report to management any medical condition or medication which could affect the safety of themselves or others.
- Employees must co-operate with the management on the implementation of the medical and occupational health provisions.

### **Trust Transport**

- Drivers must adhere to the Trust's Driving Safely at Work Policy
- Drivers must carry out prescribed checks of vehicles prior to use and in conjunction with the laid down checking procedure.
- Employees must not drive or operate any vehicles for which they do not hold the appropriate driving licence or permit.
- Employees must not carry unauthorised passengers or unauthorised loads.
- Academy principal must ensure all H&S checks, MOT and services are carried out for all Minibuses
- Employees must not use vehicles for unauthorised purposes.
- Employees must not load vehicles above the stated capacity.
- Employees must not drive or operate vehicles whilst suffering from a medical condition or illness that may affect their driving or operating ability.
- Employees must not drive whilst using a mobile phone (unless hands free) or any other electronic device.

## **Rules Covering Gross Misconduct**

An employee will be liable to summary dismissal if they are found to have acted in any of the following ways:

- A serious or wilful breach of Safety Rules.
- Unauthorised removal or interference with any guard or protective device.
- Unauthorised operation of any item of plant or equipment.
- Unauthorised removal of any item of first aid equipment.
- Wilful damage to, misuse of or interference with any item provided in the interests of Health & Safety or welfare at work.
- Unauthorised removal or defacing of any label, sign or warning device.
- Horseplay or practical jokes which could cause accidents.
- Making false statements or in any way deliberately interfering with evidence following an accident or dangerous occurrence.
- Misuse of any item of equipment, utensil, fitting/ fixture, vehicle or electrical equipment.
- Deliberately disobeying an authorised instruction.

# ARRANGEMENTS FOR HEALTH & SAFETY

## Accident, Incident and Ill-Health Recording, Reporting and Investigation

If you have an accident whilst in the course of carrying out your work, you must report the accident, however small, to a First Aider. **The First Aiders are:**

Gill Meachen is our First Aider at work,

**First aid boxes** are sited around the Academy in the following locations:

The IT office in the hall, in the staff room, in Key stage 1 shared area, in early years

You must ensure details of the accident are recorded in the **Accident Book**, which is kept at:

The office and on CPOMS

All staff must make themselves familiar with the location of the nearest first aid point, the names of the first aid personnel and the location of the Accident Book.

All near misses must also be reported to the Principal as soon as possible so that action can be taken to investigate the causes and to prevent recurrence.

### **Definitions**

An **accident** is an unplanned event that causes injury to persons, damage to property or a combination of both.

A **near miss/incident** is an unplanned event that does not cause injury or damage but could do so.

A **work-related illness** is a prescribed illness that is obtained by an employee through the course of work or from a non-employee as a result of activities carried out by the Trust.

### **Incident Reporting**

Incidents need to be reported using the Ellis Whittam Helpline section, Jemma Muncaster our office manager, will complete this, employees must ensure relevant details are shared to enable this to happen

- All COVID positive tests
- All incidents where anybody is taken directly from site to hospital
- All staff injuries
- Any incidents that may be subject to RIDDOR reporting
- Any incidents which may attract media attention or result in an insurance claim.

## **Asbestos**

The Trust will protect employees, students and other persons potentially exposed to asbestos as far as is reasonably practicable. Everyone who needs to know about the presence of asbestos will be alerted. No one will be allowed to start any work that could disturb asbestos unless the correct procedures are to be employed.

Where a problem arises relating to the condition of asbestos-containing material, the employee must inform the Site Manager.

All sites should have a PAMP folder.

Visual checks must be carried out on all encased asbestos.

All contractors must be shown the folder and they must have signed to say they have read it.

All employees must be made aware of locations where asbestos is present. This will be displayed on the H&S Notice Board.

Asbestos is present in: windowsills in the cloakrooms in Donaldson, Lewis

If an employee has reason to believe that the asbestos has been disturbed, they must report this immediately to the Site Manager/Caretaker.

The Site Manager/Caretaker will review the Asbestos Survey annually.

## **Bomb Threat**

### **Please follow government and OFSTED guidance**

Attend annual training

In the event of receiving a bomb threat please follow the below

Note the time of the call

Is the caller male/female.....accent?

Try to ascertain the caller's name

Try to keep the caller on the line to gain enough information – time, likely location of device(s)

Write down everything the caller is saying including background noise, are they telephoning from a mobile?

Whilst on the telephone – decide what your alert signal will be to another colleague to alert the Crisis Management team – see Emergency Plan

The colleague must locate and inform a member of The Crisis Management Team as soon as possible

Staff must not telephone the Police directly yourself

Do not encourage the caller to approach the school

Do not share any information about the school and/or personal details with the caller

If SATs are taking place please contact the principal

## **Communication and Consultation**

The Trust has established effective lines of communication so as to involve and consult our employees.

These include:

- individual conversations
- notice boards
- internal publications
- staff meetings
- Health & Safety meetings.

In addition the Trust displays the 'Health & Safety Law – What You Need To Know' poster on the H&S Notice Board.

Other useful information can be found on the H&S Notice Board, such as:

- H&S/Premises Policies
- First Aid Information

- Bomb Threat Procedures
- Fire Procedures/Fire Muster Areas/Fire Warden
- Emergency Plan
- Asbestos information
- H&S Minutes of Meetings
- Evacuation, Invacuation, Lockdown (EIL) procedures
- How to report accidents/incidents

## **Disabled Persons including Students with Special Educational Needs (SEN)**

The Trust will give full and proper consideration to the needs of disabled employees, students and visitors.

To achieve this, the Trust will:

- treat all disabled employees, students and visitors with respect and dignity, both in the provision of a safe working environment and in equal access to the Trust's facilities
- ensure that risk assessments are undertaken of the special needs of the disabled and carry out reasonable adjustments to the premises and/or employment arrangements
- encourage employees with special needs to suggest any premises or task improvements to their line managers
- discipline any employees found treating their disabled colleagues with less than the expected standards of respect and dignity
- in an emergency evacuation, ensure suitable plans are in place which will assist disabled people to leave the premises swiftly.

## **Display Screen Equipment (Computers)**

All reasonable steps will be taken by the Trust to secure the Health & Safety of employees who work with display screen equipment.

This policy is aimed at those who regularly use DSE, known as 'Users':

- a) for continuous periods of more than one hour *and*
- b) for more than 2½ hours per day

Typically this will therefore apply to administrative functions, the teaching of computer skills and other prolonged users. You will be advised if your post allows you to be classed as a 'User'.

The Trust will carry out an assessment of each user's workstation and implement necessary measures to remedy any risks found as a result of the assessment.

### **Eye Tests and Corrective Appliances**

The Trust will arrange for the provision of free eye tests when requested and at regular intervals thereafter or where a visual problem is experienced, at no cost to the employee. Where employees require corrective appliances specifically for use with display screen equipment, the Trust will arrange for the supply of corrective appliances up to current cost limit of £50.00.

### **Training**

Employees working with display screen equipment (DSE) should comply with the instructions and training given regarding safe workstation set-up and use, including the need for regular changes of activity or breaks and the use of the equipment provided. The DSE assessment can be completed on the Safety Media portal.

### **Health**

Employees should inform their manager of any disability or health condition which may affect their ability to work using display screen equipment or be affected by working with DSE. In addition they should also report any discomfort or health concern believed to be associated with the use of DSE. Any health information will be treated confidentially.

## **Display Screen Equipment (DSE)/Visual Display Unit (VDU)**

### **Some practical tips:**

#### **Getting Comfortable**

- Adjust your chair and VDU to find the most comfortable position for your work. As a broad guide, your lumbar should be supported by the seat cushion, forearms should be approximately horizontal and your eyes the same height as the top of the VDU.
- Make sure you have enough work space to take whatever documents or other equipment you need.
- Try different arrangements of keyboard, screen, mouse and documents to find the best arrangement for you. A document holder may help you avoid awkward neck and eye movements.
- Arrange your desk and VDU to avoid glare, or bright reflections on the screen. This will be easiest if neither you nor the screen is directly facing windows or bright lights. Adjust curtains or blinds to prevent unwanted light.
- Make sure there is space under your desk to move your legs freely. Move any obstacles such as boxes or equipment.
- Avoid excess pressure from the edge of your seat on the backs of your legs and knees. A footrest may be helpful, particularly for smaller users.

#### **Keying in**

- Adjust your keyboard to get a good keying position. A space in front of the keyboard is sometimes helpful for resting the hands and wrists when not keying.
- Try to keep your wrists straight when keying. Keep a soft touch on the keys and don't overstretch your fingers. Good keyboard technique is important.

#### **Using a mouse**

- Position the mouse within easy reach, so it can be used with the wrist straight. Sit upright and close to the desk, so you don't have to work with your mouse arm stretched. Move the keyboard out of the way if it is not being used.
- Support your forearm on the desk, and don't grip the mouse too tightly.
- Rest your fingers lightly on the buttons and do not press them hard.

#### **Reading the screen**

- Adjust the brightness and contrast controls on the screen to suit lighting conditions in the room.
- Make sure the screen surface is clean.
- In setting up software, choose options giving text that is large enough to read easily on your screen, when you are sitting in a normal, comfortable working position. Select colours that are easy on the eye (avoid red text on a blue background, or vice-versa).

- Individual characters on the screen should be sharply focused and should not flicker or move. If they do, the VDU may need servicing or adjustment.

### Posture and Breaks

- Don't sit in the same position for long periods. Make sure you change your posture as often as practicable. Some movement is desirable, but avoid repeated stretching to reach things you need (if this happens a lot, rearrange your workstation).
- Most jobs provide opportunities to take a break from the screen, e.g. to do filing or photocopying. Make use of them. If there are no such natural breaks in your job, your employer should plan for you to have rest breaks. Frequent short breaks are better than fewer long ones.

## **Drivers**

Drivers will remain responsible for their safety and others and must comply with the Highway Code and Road Traffic Act.

It is the responsibility of drivers to inform the Trust of:

- anything that could affect their driving e.g. health conditions or injuries, use of prescribed medication
- changes to licence such as limitations, offences recorded, period bans
- vehicle defects that affect ability/safety to drive
- any accidents/incidents that occurred whilst driving on behalf of the Trust.

Before driving, drivers must

- review the need to travel
- have a valid licence for the vehicle they are driving
- carry out a pre-use vehicle check
- allow sufficient time to drive allowing for traffic, poor weather and rest breaks
- ensure sufficient rest
- be physically fit, with zero alcohol level and not under the influence of drugs that may affect the ability to drive
- adjust their driving position, head restraints and mirrors to ensure maximum comfort and safety.

Whilst driving, drivers must

- drive in accordance with the applicable law and with consideration for the safety of passengers and other road users
- take regular rest breaks every 2-3 hours or at first signs of tiredness
- remain in control of the vehicle at all times
- not smoke
- only use a mobile phone or other electronic device, in line with current legislation and if you feel it safe to do so.
- the academy will not accept liability for any damage or loss incurred as a result of parking on any of the Trust Premises

## **Minibus Driver Training**

The absolute minimum requirements to comply with our insurance are that the drivers:

- are over the age of 21,
- have category D1 on their licence (where the weight of the vehicle requires this),
- have at least two years experience as a qualified driver
- hold a current full driving licence with no more than 6 penalty points. If a driver has less than 6 points, the driver may still be precluded if the points are for dangerous driving.
- Have passed a Minibus driving assessment and refresher training as defined by certificate.

Prior to transporting students for the first time, all drivers will be given the opportunity of either a vehicle familiarisation session to include:

- Daily vehicle checks
- Pre-journey checks
- General driving safety
- Road testing
- Emergency stop
- Use of mirrors and indicators
- Reversing using mirrors only
- Passenger safety
- Passenger comfort.

All drivers need to be included on the Academies list of authorised minibus drivers. To be added to the list please the principal

Staff who passed the test to drive a car after 1<sup>st</sup> January 1997 are required to successfully complete a PSV test to drive the heavier weight minibus.

### **Drivers Hours**

It is the Trust's policy that if there is a trip which involves a driver being in charge on an extended day, then a second adult should accompany the party and that person should be competent to share the driving to reduce the possibility of driver fatigue. An extended day is anything beyond 7.00pm when the teacher started work at 8.45 am. This requirement is non-negotiable.

### **Driver's Responsibilities**

Whilst the academy will ensure a weekly check of the condition of the minibuses, drivers are responsible for completing the following checks before embarking on their trips:

- Do a visual inspection of the minibuses which includes tyre pressure checks and that the windscreen and glass is clean and can be seen through
- Check brakes to see that they are functioning correctly
- Ensure that mirrors and seat are in the correct driving position
- Check that all lights are functioning correctly
- Ensure that all seat belts are being worn. This includes all passengers, who must wear a seat belt
- Ensure that the windscreen washer system works and that wipers are functioning correctly
- Ensure that the vehicle is correctly loaded and that no more than sixteen passengers are being carried
- Emergency exits must not be blocked
- Ensure that all doors are correctly closed
- Check that you have enough fuel for your journey
- As soon as possible after moving off, the driver should carry out a running brake test and at the same time, check the operation of the seat belts

- At intervals throughout the journey, all instruments and warning lights should be checked and necessary action taken if a fault is indicated
- Ensure that food and drink are not consumed on the vehicle
- Make sure that no rubbish is left on the vehicle and ensure that no malicious damage has occurred to the interior of the vehicle.

At the end of the journey the driver must lock and make the vehicle secure. Keys should only be taken just prior to making use of the minibuses. The keys should be returned immediately after use to the owner of the minibus.

### **Passenger Responsibilities**

- Should wear seat belts and always remain in their seats until instructed otherwise
- Should never distract the driver by shouting etc
- students should not eat or drink on the vehicle
- Must make sure that escape routes are not blocked by bags etc
- students are ambassadors of the Trust and must never bring its name into disrepute by gesturing etc
- Passengers found to have vandalised the minibuses may face a ban from using it again and be required to pay for damages.

### **Accident Procedures**

If an accident occurs and any personal injury or damage to third party property is involved, then the driver must stop. He/she must be prepared to give his name and address and details of the owner of the vehicle to a Police Officer or any other person having reasonable grounds to ask. If for any reason the driver is not able to give these details then he/she must report in person to a Police Station as soon as practically possible, otherwise an offence is committed, and in any event not later than twenty-four hours afterwards.

Report the accident immediately to the principal and complete the appropriate forms for our insurers.

### **Breakdown and Recovery**

The minibuses are covered for breakdown and recovery. Details of how to contact the provider and our membership numbers are in the minibus.

### **First Aid**

All minibuses contain first aid boxes which are checked at the end of each term. The contents of these boxes include:

- Antiseptic wipes
- Bandages
- Assorted adhesive dressings
- Plasters
- Eye pads
- Scissors.

Any use of the first aid kit must be reported as soon as possible thereby maintaining a full kit at all times.

**Minibuses must not be used for private use.**

### **Weekly Checks**

Weekly checks of the minibuses will be carried out and recorded.

Staff who notice any defects in the minibuses should immediately notify the nominated person who will then determine whether or not the vehicle should be taken off the road and repairs carried out.

The minibuses are inspected every ten/twelve weeks and serviced in line with the manufacturers recommendations.

### **Incorrect Use of the Minibuses**

A driver who breaks the speed limit will be responsible for paying his/her own fines. Similarly fines imposed for incorrect car parking or negligent driving maybe the responsibility of the driver. Any damage caused to the minibuses through incorrect use, may result in the driver being asked to contribute fully or partially to any excess payable by the academy. These charges will be at the discretion of the Principal.

### **Speed Limits**

The speed limit for minibuses is as follows:

- 30 mph not 40 mph on urban carriageways
- 50 mph not 60 mph on single carriageways
- 60 mph not 70 mph on dual carriageways
- 70 mph on motorways.

### **List of Authorised Drivers**

The Academy will keep a list of drivers who have been authorised to drive the minibuses and ensure refresher training is completed when due.

Authorisation may be withdrawn at any time by the Principal. Any member of staff who has been advised not to drive their own vehicle for medical reasons must advise the Trust immediately.

## **Drugs and Alcohol**

### **Alcohol**

Staff must not drink alcohol on Trust premises.

Any employee who is found consuming alcohol on Trust premises or is found to be intoxicated at work will normally face disciplinary action on the ground of gross misconduct under the Trust's disciplinary procedure.

### **Drugs and medication**

The possession, use or distribution of drugs for non-medical purposes on Trust premises is strictly forbidden and a gross misconduct offence.

If you are prescribed drugs by your doctor which may affect your ability to perform your work you should discuss the problem with your manager.

If the Trust suspects there has been a breach of this policy or your work performance or conduct has been impaired through substance abuse, the Trust reserves the right to require you to undergo a medical examination to determine the cause of the problem.

### **Medical Examination**

Existing and prospective members of staff may be asked to undergo a medical examination, which will seek to determine whether he/she has taken a controlled drug or has an alcohol abuse problem.

A refusal to give consent to such an examination or a refusal to undergo the screening will result in the immediate withdrawal of any offer made to prospective staff and will normally be treated as gross misconduct for current members of staff.

If, having undergone a medical examination, it is confirmed that you have been positively tested for a controlled drug, or you admit there is a problem, the Trust reserves the right to suspend you from your employment (with or without pay) to allow the Trust to decide whether to deal with the matter under the terms of the Trust's Disciplinary Procedure and/or to require you to undergo treatment and rehabilitation.

### **Reasonable Grounds**

The Trust reserves the right to search you or any of your property held on Trust premises at any time if there are reasonable grounds to believe that this policy is being or has been infringed or for any other reason. If you refuse to comply with these search procedures, your refusal will normally be treated as gross misconduct.

The Trust reserves the right to inform the police of any suspicions it may have with regard to the use of controlled drugs by its staff on the Trust's premises.

## **Educational Visits**

All academies must have one member of staff who is trained as the Educational Visits Coordinator (EVC), he/she will be responsible for training/advising staff in relation to all off site visits. Refresher training must take place every two years.

The academies trained EVC is Jemma Muncaster

When planning an off site visit staff must:

- see the trained EVC for training on how to lead an off site visit.
- 
- be fully EV trained before they can lead any off site visits.
- 
- receive refresher training every two years.
- follow the academy off site visits procedure/policy when planning all visits
- see the EVC to complete the necessary paperwork/Engage
- seek approval before any off site visits can take place

## **Electricity**

All reasonable steps will be taken to secure the Health & Safety of employees, volunteers and students who use electrical equipment.

Employees must:

- visually check electrical equipment for damage before use
- report any defects found to the Principal/Site Manager
- not use defective electrical equipment
- not carry out any repair to any electrical item unless qualified to do so
- switch off non-essential equipment from the mains when left unattended for long periods
- not bring any electrical item onto Trust premises until it has been tested and a record of such a test has been included in the appropriate record
- not leave electric cables in such a position that they will cause a tripping hazard or be subject to mechanical damage
- never run extension leads under carpets or through doorways
- not daisy-chain extension leads to make a longer one
- not use adapter sockets – devices that plug into mains sockets to increase the number of outlets.

## **Electrical Safety**

### **What are the hazards?**

The main hazards are:

- contact with live parts causing shock/burns (normal mains voltage, 230 volts AC, can kill)
- faults which could cause fires
- fire or explosion where electricity could be the source of ignition in a potentially flammable or explosive atmosphere, e.g. in a spray paint booth.

Ensure that:

- suspect or faulty equipment is taken out of use, labelled 'DO NOT USE' and kept secure until examined by a competent person
- where possible, equipment, tools and power socket-outlets are switched off before plugging in or unplugging
- equipment is switched off and/or unplugged before cleaning or making adjustments.

### **Visual checks on electrical equipment**

1. Inspections and testing of all portable electrical equipment and the fixed electrical installations is the responsibility of the Trust, though the responsibility for undertaking visual checks falls to all employees.

2. Around 95% of all faults or damage can be found by visual checks and this will involve checking:

- for damage to the cable covering, such as cuts and abrasions, apart from light scuffing, or non-standard repairs e.g. cable wrapped with electrical tape

- where the cable enters the plug. Internal wires - those covered by the outer sheath may be exposed or the cable may be loose and move within the plug

- for damage to the plug, such as cracked casing, bent pins, evidence of overheating i.e. burn marks or discoloration

- for damage to the sockets, switches, etc. e.g. cracked or broken casing
- that equipment has been used in conditions for which it is not suitable, e.g. a wet or dusty workplace or has damage to the outer cover of the equipment or has obvious loose parts or screws
- cables are routed safely, with one extension lead used per socket. Where there is a risk of tripping over cables and they cannot be re-routed, cable strips must be fitted.

## **Evacuation, Invacuation and Lockdown (EIL)**

An evacuation will take place when the fire alarm sounds. All go to designated assembly points and await roll call.

If a series of playtime bells ring continuously, this instigates a lockdown/invacuation. Everyone returns to their classroom bases or remains in them. Once all children are back in their class base, returning from toilet or from the hall for example, all doors are closed and using the emergency keys, locked where they can be. Blinds are closed. Children and adults get under tables away from windows where possible and await instructions. An adult makes a call to the school office on 201 to report that they have all their class with them and give the total number of children. A series of playtime bell rings will signal to show the end of the need to lockdown/invacuate.

Follow government and OFSTED guidance.

The EIL Lead will need to complete the Lockdown e-learning provided by Angel Training.

All staff will need to annual Evacuation, Invacuation & Lockdown (EIL) training

### **Lockdown Procedure for Kirkheaton Primary School**

In the event of someone/something causing risk of harm to staff or/and children outside the school, either on the road or actually in the school grounds the following will happen:

1. If you suspect something is dangerous – if possible, get a message immediately to the office.
2. If you cannot get to the office, team up with another adult and immediately get a message around to all classes and say clearly “Lockdown”
3. If possible, the office will signal a lockdown procedure by ringing the playtime bell intermittently for 10 times.
4. Once the bell has been heard, or a member of staff has visited your classroom with the ‘Lockdown’ instruction, ask the children to get under desks away from windows and await further instruction.
5. Things you must do if possible
  - Ensure all your class are back in the classroom, returning from the toilet, group sessions or the IT suite for example. Count your children.
  - Lock the doors surrounding your classroom – keys are on hooks in priority places.
  - Pull down any blinds you have so nobody can see in.
  - If practicable, make your desks into one big square in the furthest corner of the room from the window/door as possible so you can all be in one place and you can reassure children. Against a solid wall where possible.
  - Turn off lights
  - Use your laminated class list and account for all your class – call the office on 201 and give them an update as to how many children you have
  - If you have a group of children shielding away from their classroom, call the office to let the office know which children you have missing from the classroom
  - Locate your mobile phone and turn to silent
  - Turn the volume down on any school phone
  - Block your doorway by moving furniture in front of it
6. Should the lockdown go on for some time, you will need to be reassuring children, maybe getting them to talk to each other quietly and helping them to understand the situation.
7. You will need to tell the children that quiet will be needed in case we need to hear instructions (actually so any intruders do not know children are in the room)
8. Await instruction
9. Should a fire alarm be activated at the same time as lockdown/invacuation – do not automatically evacuate – await instruction – this could have been activated to get people out of the building
10. If the bell rings intermittently once more, the situation is safe once more and you can return to normal

Should Lockdown happen during a **playtime or lunchtime** – the bell will not easily be heard. The person receiving the message that a lockdown is needed will go outdoors and blow a whistle/ring a

handbell (where possible) and shout 'Lockdown, lockdown, lockdown'. All staff will then shepherd all children indoors using the NEAREST door and ask them to return quickly to their class base. All staff in the staff room/doing other tasks at this point return to their classrooms where the children are if possible. Please check the next door classroom has an adult as you go in. If there is no adult present, ask the children to all come into one room and follow the same procedure. Handbells are in Y2/Y3 cloakroom and in Y6 at the top of the ramp.

In the event that you witness immediate danger outside or out in the road. You can also initiate lockdown by giving the 'lockdown, lockdown, lockdown' instruction, getting a message around to all classes, or getting a message to the office to signal the bell.

The lockdown bell is situated in the far corner of the office. Switch the bell to **manual** and it will ring, press intermittently for 10 times.

## **Fire**

All reasonable steps will be taken to prevent a fire occurring. In the event of fire, the safety of life will override all other considerations, such as saving property and extinguishing the fire.

The Trust does not require persons to attempt to extinguish a fire but extinguishing action may be taken if it is safe to do so. Immediate evacuation of the building must take place as soon as the evacuate signal is given. All occupants, on evacuation, should report to the pre-determined assembly points.

Re-entry of the building is strictly prohibited until the fire brigade officer or a senior person present declares it is safe to do so.

Employees are encouraged to report any concerns regarding fire procedures so the academy can investigate and take remedial action if necessary.

You should familiarise yourself with the location of the fire alarms, fire appliances, fire exits and assembly points.

Fire Drills must take place termly and these must be recorded in the Fire Book.

All staff must complete the Safety Media Fire Awareness training annually.

All Fire Wardens must complete the Safety Media Fire Warden training bi-annually.

Only fire blankets and the following types of fire extinguisher are currently present on site. Other types of extinguishers will be added to this chart if they are required on site.

Fire Extinguisher Chart								
Extinguisher		Class of Fire						Special Notes
Colour	Type	 Solids	 Flammable Liquids	 Flammable Gases	 Flammable Metals	 Electrical Contact	 Cooking Oils & Fats	
 Red	Water	✓ Yes	✗ No	✗ No	✗ No	✗ No	✗ No	Dangerous if used on 'liquid fires' or live electricity.
 Cream	Foam	✓ Yes	✓ Yes	✗ No	✗ No	✗ No	✗ No	Not practical for home use.
 Canary Yellow	Wet Chemical	✓ Yes	✗ No	✗ No	✗ No	✗ No	✓ Yes	Cooking Oils & Fats
 Blue	Dry Powder	✓ Yes	✓ Yes	✓ Yes	✗ No	✓ Yes	✗ No	Safe use up to 1000v.
 Blue	L2 Powder	✗ No	✗ No	✗ No	✓ Yes	✗ No	✗ No	Earlier M28 model may not work on all metals
 Black	Carbon Dioxide (CO <sub>2</sub> )	✗ No	✓ Yes	✗ No	✗ No	✓ Yes	✗ No	Safe on high and low voltages.
 White	Dry Water Mist	✓ Yes	✓ Yes	✓ Yes	✗ No	✓ Yes	✓ Yes	Safe to use on up to 35kV

## **Fire and Emergency Evacuation**

### **IF YOU DISCOVER A FIRE:**

#### **Operate the nearest fire alarm call point.**

IF IT IS SAFE TO DO SO AND IF YOU HAVE AUTHORISATION AND APPROPRIATE TRAINING, attack the fire with the fire fighting equipment provided

Always ensure there is a safe exit route before attempting to extinguish any fire.

Leave the building immediately if you cannot control the fire or your escape route is threatened.

### **ON HEARING THE ALARM:**

The fire alarm sound is a siren

#### **Immediately vacate the premises by the nearest available exit**

Close all windows and doors behind you

#### **Go to assembly point**

Report to the person in charge of your assembly point

The assembly point is located: in the playground

DO NOT RE-ENTER THE BUILDING TO COLLECT PERSONAL BELONGINGS.

DO NOT RE-ENTER THE BUILDING UNTIL TOLD TO DO SO BY THE SENIOR PERSON PRESENT

DO NOT USE LIFT UNLESS AUTHORISED TO DO SO

## **VISITORS**

All visitors should be escorted to the assembly point by their host.

It is important that they do not leave the area before notifying the senior person present.

## **LIAISING WITH EMERGENCY SERVICES**

The senior leader in charge of the fire evacuation will meet and liaise with the emergency services and any other interested parties, giving them pertinent information related to the emergency situation, such as location and details of emergency, location and presence of hazardous and flammable materials, head count statistics, etc.

## **First Aid**

### **Guidelines on Responding to Injuries**

#### ***Minor injuries***

The following injuries are considered minor and capable of being dealt with by a first aider in Trust: Grazes, small scratches, bumps, minor bruising, minor scalding or burns resulting in slight redness to the skin.

Injuries requiring medical attention:

- Deep cut
- Long cuts. Long cuts are considered to be approximately 1 inch when on the hand or foot and 2 inches when elsewhere on the body.
- The cut is jagged.
- The injury involved a pet, especially a cat.
- The injury involved a wild animal.
- The injury is due to a bite, either human or animal.
- The wound has debris stuck in it after cleansing.
- The wound is bleeding heavily.
- The wound will not stop bleeding after applying direct pressure for 10 minutes.
- The injury is a puncture wound.

#### ***Head and face injuries***

Injuries to the head and face need to be treated with particular care. Any evidence of following symptoms may indicate serious injury and an ambulance must be called.

- unconsciousness, or lack of full consciousness (i.e. difficulty keeping eyes open);
- confusion
- strange or unusual behaviour – such as sudden aggression
- any problems with memory;
- persistent headache;
- disorientation, double vision, slurred speech or other malfunction of the senses;
- nausea and vomiting;
- unequal pupil size;
- pale yellow fluid or watery blood coming from ears or nose;
- bleeding from scalp that cannot quickly be stopped;
- loss of balance;
- loss of feeling in any part of body;
- general weakness;
- seizure or fit.

#### **Hospital Admission**

Where a student is required to attend hospital using an ambulance and their parents are unable to attend hospital promptly, a member of staff should go to the hospital.

In the exceptional circumstance of parental permission being required, and the parent is unobtainable, a member of staff can act in loco parentis.

If a child is taken directly to hospital they will be accompanied by a member of staff who will stay with the student until discharged or until a handover can be made to a Parent or Carer.

The member of staff at the hospital must update the academy on the condition of the injured student as and when information is made available.

The Parent/Carer of a student attending hospital must be advised at the earliest opportunity.

Support for the injured student and their parents will be provided as determined by the individual circumstances of the incident.

### **Blood and Body Fluid Spillages**

It is important that spillages of blood, faeces, vomit or other body fluids are dealt with immediately as they pose a risk of transmission of infection and disease, e.g. blood borne viruses and diarrhoeal and vomiting illnesses, such as norovirus.

A spillage kit is available in the academy to deal with blood and body fluid spillages, which is located in the caretakers cupboard

The person responsible for checking and replenishing the kit regularly is Gill Meachen.

### ***Spillage Procedure***

Body fluid spillages should be dealt with as soon as possible with ventilation of the area. Anyone not involved with the cleaning of the spillage should be kept away from the area and protective clothing should be worn when dealing with the spillage such as gloves and aprons.

In the event of a spillage, cordon off the area where the spillage has occurred.

Cuts and abrasions on any areas of the skin of the cleaner should be covered with a waterproof dressing. Disposable gloves and apron must also be worn, and if necessary use additional Personal Protective Equipment and clothing to protect the body and clothes.

### ***Hard surfaces e.g. floor tiles, impervious table tops.***

In the event of small spills or splashes of blood, clean with neutral detergent and hot water.

### ***Large spills***

In the event of a large spill of blood, faeces or other bodily fluid:

- Remove the spillage as much as possible using absorbent paper towels
- Flush these down the toilet or dispose of them carefully in waste bag
- Cover any remaining spillage with paper towels soaked in diluted bleach solution (1:10 dilution with cold water)
- Leave the paper towels in place for up to 30 minutes, and then clear them away.

**Alternatively**, large spills may be covered with granules from the spillage kit for two minutes. The spillage and the granules should be carefully removed with paper towels and disposed of carefully into a waste bag.

Clean area with neutral detergent and hot water once either procedure has been completed.

### ***Soft surfaces and fabrics e.g. carpets and chairs***

For spills on soft surfaces and fabrics:

- Remove the spillage as far as possible using absorbent paper towels,
- Clean with a fresh solution of neutral detergent and water, and

- Carpets and upholstery can then be cleaned using a suitable cleaning product. Steam cleaning may be considered if necessary.

Contaminated gloves, aprons, paper towels, etc should be carefully disposed of into a leak proof plastic bag, securely tied and placed immediately into the normal external Trust waste container. Large quantities of contaminated waste should be disposed of in consultation with the local waste authority.

All employees should wash their hands after taking part in any of the above procedures.

As with other all hazardous substances used in Trust, bleach and disinfectants should be stored, handled and used in accordance with the Control of Substances Hazardous to Health (COSHH) Regulations and the manufacturer's instructions. Product data sheets and safe use instructions should be easily accessible, along with risk assessments and details of actions required in the event of accidental ingestion, inhalation or contact with skin or eyes.

All chemicals must be stored in their original containers, in a cool, dry, well-ventilated place that is lockable and inaccessible to children, visitors and the public.

Appropriate protective clothing (e.g. gloves and aprons) should be worn when handling bleach and other chemical disinfectants. Contact with skin, eyes and mouth should be avoided at all times when handling or using them.

## **Gas Installations and Appliances**

The Trust will ensure that all work carried out on gas fittings and appliances are in accordance with the requirements of the regulations and the Safety in the Installation and Use of Gas Systems and Appliances Manual.

### **Gas Emergencies**

In the event of a suspected gas leak:

1. Call 24 hour gas emergency service on 0800 111 999
2. Evacuate the buildings and move the students and majority of the staff to a distance of at least 250 metres away. Nominate some staff to stay at a safe distance to prevent access to the site and await the emergency National Grid engineer.
3. If it is safe to do so:
  - Put out naked flames
  - Open doors and windows
  - Turn off the gas supply.

### **DO NOT TURN ELECTRICAL SWITCHES ON OR OFF**

4. If the general public in the neighbourhood are at risk contact the police on 999

No person shall interfere with any gas appliance or gas fitting or pipe work unless qualified and competent to do so.

## **Hazardous Substances (COSHH)**

All reasonable steps will be taken to ensure all exposure of staff and students to substances hazardous to health is prevented or at least controlled to within statutory limits.

The Trust will give sufficient information and training to ensure full understanding of the hazards to health posed by substances in the workplace and the importance of the control measures provided. Information will also be given to others who may be affected such as contractors, temporary staff and visitors where appropriate.

Staff should **not** use any hazardous substance unless they have received the information and training for the safe use of that substance.

There are a range of hazardous substances to which the regulations apply. These include:

- those classified and shown with warning label
- substances with Occupational Exposure Limits
- biological agents e.g. Legionella bacteria
- any kind of dust
- substances generated by work processes e.g. various bacteria/viruses from bodily fluids
- premises with covered or underground parking that may expose people to vehicle exhaust fumes and some manufacturing and cleaning processes that may give off dusts, vapours or fumes.

### **Hazard Labelling**

Hazardous substances may be defined as being toxic, a health hazard, a serious health hazard, flammable, oxidising, explosive, harmful to the environment or gases stored under pressure.

Classification of hazardous substances is currently done under the Classification Labelling and Packaging (CLP) Regulations, which came into full effect in June 2015. These Regulations require hazardous substances to be packaged and labelled to an internationally agreed standard.

Hazardous substances can be readily identified by their label:

	<b>Health Hazard</b>		<b>Corrosive</b>		<b>Toxic</b>
	<b>Flammable</b>		<b>Oxidising</b>		<b>Harmful to the environment</b>
	<b>Serious Health Hazard</b>		<b>Explosive</b>		<b>Gases under pressure</b>

Hazardous substances that are generated by work processes are not as easily identifiable as they do not come conveniently labelled. You will be informed of any hazardous substances generated by the Trust's work processes.

## Exposure Routes

Exposure to hazardous substances may be via:

- inhalation e.g. dust/particulate or vapours/fumes
- contact with eyes or cuts
- absorption through the skin
- ingestion
- injection

## Hazard Effects

Effects on health may be short-term or long-term and will generally vary according to levels and duration of exposure. Effects of substances also vary with some having an accumulative effect and some that will have only temporary health effects.

## Control Principles

The principles applied to substances to control exposure are:

1. elimination e.g. don't use the substance
2. substitution e.g. a less hazardous substances
3. engineering controls e.g. Local Exhaust Ventilation
4. information, instruction, supervision and training
5. Personal Protective Equipment (PPE) e.g. gloves, glasses, overalls.

## Working with Hazardous Substances

Prior to working:

- ensure you understand the risks of working with any hazardous substances and the controls in place
- ensure you know the location of the material safety data sheets and risk assessments
- ensure the controls specified in the risk assessment, including any items for emergencies are:
  - in place
  - fully operational
  - available.
- ensure you understand how to operate or use any control measures safely and have received training prior to starting work.

Whilst working

- ensure regular check controls are effective
- clean up any spillages etc
- report any problems or defects immediately to your manager
- report any ill-health or accidents to your manager.

## **Infection Control**

Trust staff and students are from time to time at risk of infection or of spreading infection.

The Trust aims to minimise the risk of the spread of infection and will implement appropriate policies and procedures.

### **Staff Illness and Reporting**

Staff should notify the Principal if they develop any of the following infectious diseases or symptoms:

- skin infections or exposed areas of infestation
- severe respiratory infection (e.g. pneumonia, TB)
- severe diarrhoea
- jaundice
- hepatitis
- Chicken Pox, Measles, Mumps, Rubella
- norovirus
- gastroenteritis
- HIV
- COVID-19

The Principal will need to discuss with the individual suitable controls. In some cases, employees may need to be referred to an Occupational Health Practitioner or their GP for advice.

Staff should report diseases including Leptospirosis, Hepatitis, TB, and Tetanus which have been contracted through work as these are reportable under RIDDOR (Reporting of Injuries, Diseases and Dangerous Occurrences Regulations).

### **Confidentiality**

Confidentiality will be maintained at all times in relation to an employee who is known to have any infectious disease.

No health information will be disclosed without the written consent of the employee concerned and any breach of such confidentiality, either inside or outside the organisation, will be regarded as a disciplinary offence and may result in disciplinary action.

### **COVID19**

The Academy Risk Assessment for COVID19 is available on the school website and will be sent out as a school ping message during every update. All staff must follow the control measures put in place. Staff who are displaying symptoms of COVID19 should not attend the Academy

## **Interactive Whiteboards**

All reasonable steps will be taken by the Trust to secure the Health & Safety of employees and students when interactive whiteboards are used.

### **Guidance for Users**

- teachers and students should avoid staring into the projector beam at all times
- try to keep your back to the beam as much as possible
- use the stick or laser pointer provided whenever possible.

## **Ladders and Stepladders**

This guidance is to help you:

- know when to use a ladder
- decide how to go about selecting the right sort of ladder for the particular job
- understand how to use it
- know how to look after it
- take sensible safety precautions.

When is a ladder the most suitable access equipment?

As a guide, **only** use a ladder or stepladder:

- in one position for a maximum of 30 minutes
- for 'light work' - they are not suitable for strenuous or heavy work. If a task involves you carrying more than 10 kg (a bucket of something) up the ladder or steps it will need to be justified by a detailed manual handling assessment
- where a handhold is available on the ladder or stepladder
- where you can maintain three points of contact (hands and feet) at the working position.

On a **ladder** where you cannot maintain a handhold, other than for a brief period of time, other measures will be needed to prevent a fall or reduce the consequences of one. On **stepladders** where a handhold is not practicable you will need to consider whether it is safe to work or not.

Is it a safe place to use a ladder or stepladder?

As a guide, **only** use a ladder or stepladder:

- on firm ground or spread the load (e.g. use a board)
- on level ground - for stepladders refer to the manufacturer's instructions, for ladders the maximum safe ground slopes on a suitable surface (unless the manufacturer states otherwise) are as follows:
  - side slope 16° – but the rungs still need to be levelled
  - back slope 6°.
- on clean, solid surfaces (paving slabs, floors etc). These need to be clean (no oil, moss or leaf litter) and free of loose material (sand, packaging materials etc) so the feet can grip. Shiny floor surfaces can be slippery even without contamination.

Never stand ladders or stepladders on moveable objects, such as pallets, bricks, lift trucks, tower scaffolds, vans, stacks of paper or boxes etc. If the ladder or stepladder won't reach, you need to use a more suitable type of access equipment.

You should **only** use ladders or stepladders:

- where they will not be struck by vehicles, by protecting them with suitable barriers or cones
- where they will not be pushed over by other hazards such as doors or windows, by securing doors (not fire exits) and windows where possible. If this is impractical, have a person standing guard at a doorway, or inform building occupants not to open windows until they are told it is safe to do so

- where pedestrians are prevented from walking under them or near them, by using barriers, cones or, as a last resort, a person standing guard at the base.

Safety in use – ladders

On a ladder **do not**:

- overload it – you and anything you are carrying should not exceed the highest load stated on the ladder
- overreach - keep your navel inside the stiles and both feet on the same rung throughout the task
- rest ladders against weak upper surfaces e.g. glazing or plastic gutters. Use effective spreader bars instead
- use the top three rungs
- move the ladder while someone is using it
- extend a ladder while standing on the rungs
- slide down the stiles.

Overreaching – not maintaining  
3 points of contact

Maintaining 3 points of contact

**Do:**

- make sure the ladder rungs are level. This can be judged by the naked eye. Ladders can be levelled using specially designed devices but not by using bits of brick or whatever else is at hand
- check that the weather is suitable - do not use ladders in strong or gusting winds
- wear sensible footwear. Shoes should not have the soles hanging off, have long or dangling laces, or be thick with mud or other slippery contaminants. High heels are also unsuitable!

- check that you are fit. Certain medical conditions or medication, or a fear of heights, could mean that you shouldn't be working at height
- know how to tie a ladder properly.

You should also avoid holding items when climbing (for example by using tool belts). If you must carry something you must still have one free hand to grip the ladder. Remember the **THREE POINTS OF CONTACT RULE** – 2 hands and 1 foot or 2 feet and 1 hand **MUST BE** on the ladder at all times when climbing and descending.

Ladders must be erected at an angle of 75°. To judge the angle use the angle indicator marked on the stiles of some ladders or the 1 in 4 rule (1 unit out for every 4 units up).

Ladders used for access to another level must be tied and should extend at least 1 metre above the landing point to provide a secure handhold.

### Correct 1 in 4 angle:

### Securing a ladder

To prevent the ladder slipping away from the wall, or slipping sideways, you must secure it. The options for securing a **ladder** are:

- tie the ladder to a suitable point, making sure both stiles are tied
- where this is not practical, use a safe, unsecured ladder or a ladder supplemented with an effective ladder stability device
- if this is not possible, then securely wedge the ladder e.g. against a wall
- if none of the above can be achieved, foot the ladder. Footing is the last resort and other methods of securing the ladder should be used in preference.

If you do have to foot a ladder, be aware that this will not stop a ladder slipping sideways at the top. Individuals footing ladders should apply weight downwards on the ladder by standing on a rung, or by pushing against the ladder stiles (although this is less effective).

Ladder tied at the top stiles (correct for working on, but not for access)

Tying part way down

Tying near the base

Securing at the base

### Safety in use – stepladders

On a stepladder **do not**:

- overload it – you and anything you are carrying should not exceed the highest load stated on the stepladder
- use it in locations where the restraint devices cannot be fully opened. Any locking devices must also be engaged
- use the top two steps of a stepladder, unless a suitable handrail is available on the stepladder
- use the top three steps of swing-back or double-sided stepladders, where a step forms the very top of the stepladder.

Correct – two clear rungs. Don't work any higher up this type of stepladder.

Correct – 3 clear rungs, do not work any higher on this type of stepladder

When using stepladders, avoid work that imposes a side loading, such as side-on drilling through solid materials (e.g. bricks or concrete), by having the steps facing the work activity. Where side-on loadings cannot be avoided you should prevent the steps from tipping over, for example by tying the steps to a suitable point, or you should use a more suitable type of access equipment.

Incorrect – steps side on to work activity

Correct – steps facing work activity

Where you cannot maintain a handhold (e.g. putting a box on a shelf), the use of a stepladder will have to be justified by taking into account:

- the height of the task
- a safe handhold still being available on the stepladder
- whether it is light work
- whether it avoids side loading
- whether it avoids overreaching
- whether your feet are fully supported
- whether you can tie the stepladder.

Consider tying a **stepladder** where possible and helpful to the task (e.g. side-on working or where two free hands are needed). Stepladders should not be used for access to another level unless they have been designed for this.

## Is the ladder or stepladder safe to be used?

You must check that the ladder or stepladder is in a safe condition before using it (a daily pre-use check). As a guide, **only** use ladders or stepladders that:

- have no visible defects
- have a current detailed visual inspection (look for an inspection label)
- are suitable for work use. Use Class 1 or EN 131 ladders or stepladders at work because domestic (Class 3) ones are not normally suitable for use at work
- have been maintained and stored in accordance with the manufacturer's instructions.

Also, you must always use a non-conductive ladder or steps for any necessary live electrical work.

## Pre-use checks

Look for obvious visual defects before using a ladder or stepladder. Check that:

- all the ladder feet are fitted
- the feet are in good repair (not loose, missing, splitting, excessively worn, secure etc)
- the feet are clean - the feet should be in contact with the ground. Ladder feet should also be checked when moving from soft/dirty ground (e.g. dug soil, loose sand/stone, a dirty workshop) to a smooth, solid surface (e.g. paving slabs), to ensure the foot material and not the dirt (e.g. soil, embedded stones or swarf) is making contact with the ground
- all the screws, bolts and hinges are secure
- on a stepladder, that the "spreaders" on the ladder can be locked into place
- There are no other obvious signs of damage such as cracks.

If you find a problem, DO NOT USE the ladder. It should be repaired (if practicable) or destroyed

## Storage

When storing ladders and stepladders, store them in a well ventilated area to prevent sagging and warping. Store straight ladders in flat racks or on wall brackets, don't hand them from the rungs. Store step ladders in the closed, vertical position.

The information in this Guidance is based on the HSE leaflet 'Safe use of ladders and step ladders'.

## **Lasers**

The Trust requires all staff and students to comply with the general controls and the specific controls that are required for each class of laser.

Laser radiation within the 400nm to 700nm wavelength is visible to the eye, but laser equipment operating below 400nm or above 700nm will also produce invisible laser radiation. All laser equipment will be correctly labelled and these labels will specifically identify if it produces visible and/or invisible laser radiation. Staff should ask their line manager **before** using the laser equipment if they are unsure about its operating wavelength or classification.

Staff and students are also required to inform the Trust if they have any medical conditions that may worsen with exposure to light, or if they are using any medication that may react badly with light.

Staff must remember that the classification system is designed to help identify and control the risks from laser radiation. It has no bearing on the electrical or mechanical risks from laser equipment. Staff are obliged to treat all laser equipment with equal care and not regard a piece of laser equipment as being less dangerous merely because it has a lower laser classification.

Staff, students or other persons must **NOT** look directly into the laser (whether by looking directly at the emitter or by looking directly at its reflection in a mirror/glass etc.). All incidents where a person's eye has been exposed to a laser, or where a person's skin has been exposed at extremely close range to a laser, must be reported to a line manager or first aider without delay.

### **Laser Pointers**

The Trust has provided laser pointers for to assist teaching staff with classroom work. When using laser pointers, staff must:

- follow the manufacturer's safety instructions at all times
- not point the laser pointer at or towards the audience
- remove mirrored or reflective surfaces that could reflect the laser from the room before using the laser pointer, or avoid pointing it at them if they cannot reasonably be removed
- never look into the laser aperture, regardless of whether the laser is switched off or on
- maintain ambient lighting in the room when using the laser pointer, and avoid blackout conditions wherever possible
- never allow unauthorised use, especially by students.

### **First Aid**

If a member of staff, student or other person is taken to hospital as a result of exposure to a laser (whether as a precaution or for treatment), the injured person or the person accompanying them must give the following information to the hospital staff or ambulance crew:

- the length of the time that the injured person may have been exposed to the laser beam
- the method of exposure (e.g. looking directly into the beam or through a reflection)
- the power output of the laser
- the classification of the laser
- the wavelength of the laser
- any other relevant information specified by the manufacturer of the laser equipment.

## **Legionnaires Disease**

All reasonable steps will be taken to identify potential legionellosis hazards and to prevent or minimise the risk of exposure.

At risk systems include the hot and cold water storage and distribution system. To achieve control of legionella bacteria the Trust will implement measures to ensure any growth of the bacteria is kept to a minimum and systems maintained.

Day to day responsibility for monitoring and ensuring that the systems are being correctly operated lies with the Site Manager / Cleaners and any problems should be reported to them.

The Duty Holder is: The Principal

The Responsible Person is: Site manager

## **Lone Workers**

### **Rules for lone workers**

- Anyone working alone must have access to a telephone and ensure that a relative or colleague is aware;
- The caretaker (or other named person) must be informed of anyone intending to work late and a satisfactory arrangement made for locking up the building;
- When the caretaker (or other named person) is not present all lone workers, for reasons of security, Health & Safety, should lock themselves in the building.
- Staff must not place themselves in danger by challenging intruders or vandals but should call the police for assistance.
- Staff working alone have a responsibility for making themselves familiar with and following the Trust's safety procedures and location of safety equipment.
- If staff rely on mobile phones they must ensure that their network has good reception within the building. Although phones can give extra reassurance, they do not provide complete protection and staff should still be alert for their own personal safety at all times.
- In the situation where two or more people are working in isolated areas of an otherwise unoccupied building, personnel should keep each other informed about their movements.

### **Opening/Closing the building**

- When the last person has left the building and notified the caretaker (or other named person), he should then secure the building. This includes the closing of all fire doors and leaving on any emergency and exterior lights.
- When the caretaker (or other named person) arrives in the morning he must make a quick examination of the exterior of the building to make sure that there are no signs of a break-in or of anyone having been in the building. If the caretaker is in any doubt he should contact the Police/security firm and should never enter the building if he is unsure of his/her safety.
- Key holders are also advised to inform someone when they are attending an alarm call out.

### **Emergency Considerations**

Lone workers should be capable of responding correctly to emergencies. Risk assessment should identify foreseeable events. Emergency procedures should be established and the people concerned trained in using the procedures.

Emergency Procedures may need to cover:

- fires resulting from the activity or work being undertaken
- if a person has an accident what needs to be done to recover them, especially important in laboratories
- actions to be taken in case of a chemical spill
- actions to be taken in the event of power failure (for example where the person is
- reliant on power for their safety systems or for egress from a building e.g. power operated doors).

## **Manual Handling**

Unnecessary or incorrect handling can cause injury, in particular to the back.

Do not try to lift anything beyond your individual capability and before ascertaining weight, stability and centre of gravity.

The correct handling technique required to lift items safely is demonstrated below:

### **1 Planning**

Plan the lift, consider where the load is to be placed, the distances involved; are there any obstructions such as closed doors, is assistance required and can handling aids or equipment be used?

### **2 Feet**

The feet should be positioned apart (shoulder width), one foot ahead of the other in the direction of the intended movement

### **3 Knees**

Adopt a good posture for handling with the knees bent (not squat – don't kneel), in order to gain the most effective power from the thigh muscles

## 4 Back

The back should be straight - not necessarily vertical (15° - 20° from vertical is alright) keeping the natural curve of the spine. It may help to tuck in the chin. If necessary, lean forward a little over the load to get a good grip and to keep the centre of gravity over the load.

## 5 Arms

The arms should be close to the body (nearer the centre of gravity) with the shoulders level and facing the same direction as the hips.

## 6 Hands

Ensure a firm grip on the load. Holding the load this way is also less tiring than keeping the fingers straight.

## 7 Head

Raise the chin out and up as the lift begins, otherwise this results in round shoulders and a curved spine.

## 8 Moving the load

- Keep the load as close to the trunk for as long as possible, and where relevant, keep the heaviest side of the load close to the body. Slide the load towards you if required.
- Lift smoothly
- Move the feet not the trunk when turning to the side, i.e., don't twist.
- Put the load down and then slide the load into the required position if necessary.

## 9 Team Handling

Handling by two or more people may make possible an operation that is beyond the capability of one person, or reduce the risk of injury to a solo handler.

Additional difficulties may arise if team members impede each other's vision or movement, or if the load offers insufficient good handholds. This can occur particularly with compact loads which force the handlers to work close together or where the space available for movement is limited.

When lifting loads at or near floor level is unavoidable, handling techniques which allow the use of relatively strong leg muscles rather than those of the back are preferable, provided the load is small enough to be held close to the trunk. In addition, if the task includes lifting to shoulder height, allow the handlers to change hand grip. Bear in mind, however, that such techniques impose heavy forces on the knees and hip joints which must carry both the weight of the load and the weight of the rest of the body.

The closeness of the load to the body can also be influenced by foot placement. The elimination of obstacles which need to be reached over or into will permit the handler's feet to be placed beneath or adjacent to the load before beginning the manual handling operation.

## **Needlestick or Sharps Injuries**

A needlestick or sharps injury is when the skin is punctured or scratched by a needle or sharp device that may be contaminated. Needles will most commonly be found in adrenaline auto-injectors (known as EpiPens) or other medication prescribed to students or staff in an auto-injector. Needles, sharps and other waste or drug paraphernalia may also be illicitly brought on site by students, or be dumped on site by members of the public in an attempt to covertly dispose of it. As such, staff should be aware of the hazards posed by needles, sharps and similar waste.

The direct handling of needles should be avoided. If this is not possible pick up the needle by the thick end wearing gloves. The needle should then be placed in an appropriate container for disposal. A used EpiPen or other auto-injector for medication should be treated in the same way even if it incorporates a mechanism for automatically re-sheathing the needle after use.

If you suffer an injury from a needlestick or sharp which may be contaminated you must:

- encourage the wound to gently bleed, ideally holding it under running water
- wash the wound using running water and plenty of soap
- don't scrub the wound whilst you are washing it
- don't suck the wound
- dry the wound and cover it with a waterproof plaster or dressing
- seek medical assistance as advised by the First aiders
- report the injury to your line manager.

## **New and Expectant Mothers**

The Trust recognises that the general precautions taken to protect the Health & Safety of the workforce as a whole may not in all cases protect new and expectant mothers and there may be occasions when, due to their condition, different and/or additional measures will be necessary.

Should you become pregnant or are returning to work after having a baby, then you are requested to notify your Principal at the earliest possible opportunity so a risk assessment can be carried out.

Any necessary control measures will be implemented and reviewed regularly. Where risks cannot be eliminated or reduced to an acceptable level then consideration will be given to adjusting working conditions and/or hours or if necessary providing suitable alternative work or suspension with pay.

New or expectant mothers should inform their Principal of any changes which may affect the risk assessment including any medical conditions, incidents etc.

## **Personal Protective Equipment**

The academy/Trust provides personal protective equipment (PPE) when the risk presented by a work activity cannot be eliminated or adequately controlled by other means. When it is provided, it is because Health & Safety hazards have been identified that require the use of PPE and it is therefore necessary to use it in order to reduce risks to a minimum.

Employees and volunteers provided with PPE must:

- wear the PPE as instructed or where indicated by signage
- maintain it in good condition
- report any defects to your manager
- ensure the PPE fits correctly, is comfortable and fully adjusted.

## **Risk Assessments**

The Academy maintains a bank of Risk Assessments, the can be found on staff shared drive in health and safety. A register of Risk Assessments is kept by please insert Jemma Muncaster, office manager.

Whilst carrying out their duties, employees must adhere to control measures laid out in Risk Assessments.

Any activity which has extra risk of harm such as burning, falling, drowning, infection, allergic reactions, and any visit/visitor/trip out of school must have an accompanying risk assessment written by the person responsible for the activity. These must be seen by the principal before the activity goes ahead and shared with all relevant staff. A signed copy will be kept in the office.

Should you need additional Risk Assessments or have any questions or queries regarding the measures in place please speak to the principal.

## **Safeguarding**

All education professionals, including administrative and facilities staff as well as teaching staff, have a statutory duty of care to all students. This duty extends to promoting the welfare of students who require additional support but are not suffering harm or at immediate risk of harm.

The Trust will promote awareness and best practice to deal with situations of suspected abuse or neglect and situations in which staff are best placed to observe such signs. The Academy has appointed Caroline Fowler and Samantha Gallant as the designated safeguarding lead, who is responsible for providing support to staff members in their safeguarding duties and for liaising closely with the relevant social services such as children's social care.

### **Staff Responsibilities**

The Trust requires all staff to:

- assist in providing a safe environment in which children can learn
- raise all concerns with the designated safeguarding lead, including concerns about other staff members
- always err on the side of caution and report suspected cases of abuse or neglect
- report concerns directly to children's social care if it is not possible to raise them with the designated safeguarding lead
- always act in the best interests of the child
- complete the Safety Media Safeguarding training annually
- Read Part 1 Keeping Children Safe in Education (KCSIE) 2020 and Annex A

**If at any point there is a risk of immediate serious harm to a child, staff members should make an immediate referral to the Designated Safeguarding Lead or children's social care. If the child's situation does not improve, staff members with concerns should press for re-consideration.**

### **Record Keeping**

We will ensure that appropriate, accurate, legible and contemporaneous records of safeguarding concerns are made and stored securely in accordance with the Data Protection Act.

### **Further Information**

All staff should refer to the Safeguarding Policy for full details of the Trust's policy and arrangements for safeguarding.

## **Smoking**

Exposure to second-hand smoke, also known as passive smoking, increases the risk of lung cancer, heart disease and other illnesses. Ventilation or separating smokers and non-smokers within the same airspace does not stop potentially dangerous exposure.

It is the policy of the Trust that all of its premises are smoke-free and that all staff and students have a right to work in a smoke-free environment.

Smoking is prohibited throughout the entire Trust, including the use of all artificial smoking aids (electronic or otherwise) with no exceptions. This policy applies to all employees, students and visitors in all areas of the Trust, including Trust vehicles.

### **Implementation**

All staff are obliged to adhere to and facilitate the implementation of the policy.

The Trust will ensure that all staff and contractors are aware of the policy on smoking. They will also ensure that all new personnel are given a copy of the policy on recruitment or induction.

Appropriate 'no smoking' signs will be clearly displayed at or near the entrances to the premises. Signs will also be displayed in Trust vehicles that are covered by the law.

## **Stress**

The Health & Safety Executive define stress as “the adverse reaction people have to excessive pressure or other types of demand placed on them”. This makes an important distinction between pressure, which can be a positive state if managed correctly, and stress which can be detrimental to health.

Stress at work can come about for a variety of reasons. It may be excessive workload, unreasonable expectations, or overly-demanding work colleagues. As a reasonable Trust, we try to ensure that you are in a pleasant working environment and that you are as free from stress as possible.

Employees who experience unreasonable stress which they think may be caused by work should raise their concerns with their manager or through the Trust’s grievance procedure. If deemed appropriate, the Trust will provide access to confidential counselling for staff affected by stress caused either by work or external factors

Following action to reduce the risks, they shall be reassessed. If the risks remain unsustainable by the member of staff concerned, efforts shall be made to reassign that person to other work for which the risks are assessed as tolerable.

## **Supporting Students with Medical Needs**

The Trust's policy is to support students to attend school who have a medical condition. The academy will therefore support the administration of short and long term medication and medical techniques where this is necessary for the student to continue to be educated at Kirkheaton Primary School. The academy will also put in place procedures to deal with emergency medical needs.

The academy will establish procedures to ensure that all concerned, staff, parents, students and, where relevant, health professionals are aware of the student's condition and what steps have been agreed either to manage the condition on a daily basis or to be implemented in case of an emergency.

Individual Health Care Plans are in place for those students with significant medical needs e.g. chronic or ongoing medical conditions such as diabetes, epilepsy, anaphylaxis etc. These plans will be completed at the beginning of the academic year / when child enrolls / on diagnosis being communicated to the academy and will be reviewed/updated annually.

### **Administering Medicines**

No child under 16 should be given medicines without their parent's written consent. Any member of staff giving medicines to a child should check: the child's name; prescribed dose; expiry date; written instructions provided by the prescriber on the label or container.

If in doubt about any procedure staff should not administer the medicines but check with the parents or a health professional before taking further action. If staff have any other concerns related to administering medicine to a particular child, the issue should be discussed with the parent, if appropriate, or with a relevant health professional.

### **Self-Management**

It is good practice to support and encourage children, who are able, to take responsibility to manage their own medicines from a relatively early age. As children grow and develop they should be encouraged to participate in decisions about their medicines and to take responsibility.

Where children have been prescribed controlled drugs, staff need to be aware that these should be kept safely. However children could access them for self-medication if it is agreed that it is appropriate.

### **Refusing Medicines**

If a child refuses to take medicine, staff should not force them to do so, but should note this in the child's record and follow the agreed procedures. Parents should be informed of the refusal on the same day.

### **Educational Visits**

The academy will consider what reasonable adjustments they might need to make to enable children with medical needs to participate fully and safely on visits. This might include reviewing and revising the visits policy and procedures so that planning arrangements will include the necessary steps to include children with medical needs. It might also include risk assessments for such children. These adjustments should be documented on the trip paperwork.

Sometimes additional safety measures may need to be taken for outside visits. It may be that an additional supervisor, a parent or another volunteer might be needed to accompany a particular child. Arrangements for taking any necessary medicines will also need to be taken into consideration. Staff supervising visits should always be aware of any medical needs and relevant emergency procedures. Copies of health care plans should be taken on visits in the event of the information being needed in an emergency.

## Sporting Activities

Any restrictions on a child's ability to participate in PE should be recorded in their individual Health Care Plan. All adults should be aware of issues of privacy and dignity for children with particular needs.

Some children may need to take precautionary measures before or during exercise and may also need to be allowed immediate access to their medicines such as asthma inhalers. Staff supervising sporting activities should consider whether risk assessments are necessary for some children, be aware of relevant medical conditions and any preventative medicine that may need to be taken and emergency procedures.

## Trust Transport

Where students have life threatening conditions, specific health care plans should be carried on vehicles. The care plans should specify the steps to be taken to support the normal care of the student as well as the appropriate responses to emergency situations.

All drivers and escorts should have basic first aid training. Additionally trained escorts may be required to support some students with complex medical needs. These can be healthcare professionals or escorts trained by them.

Some students are at risk of severe allergic reactions. Risks can be minimised by not allowing anyone to eat on vehicles. All escorts should also be trained in the use of an adrenaline pen for emergencies where appropriate.

## Non Prescription Medication

Non prescription medication should not be administered by the academy. This includes paracetamol and homeopathic medicines.

Staff may not know whether the student has taken a previous dose, or whether the medication may react with other medication being taken. **A child under 16 should never be given aspirin containing medicine, unless prescribed by a doctor.**

Where it is necessary to administer non-prescription medicine to a child for example after dental surgery or for migraine, specific written permission must be obtained from parents / carers and the administration documented.

If a student suffers regularly from acute pain, such as migraine, the parents should authorise and supply appropriate painkillers for their child's use, with written instructions about when the child should take the medication. A member of staff should notify the parents that their child has requested medication and supervise the student taking the medication if the parents have agreed to it being taken.

## **Temporary Staff and Volunteers**

The Trust will take the necessary measures to ensure the Health & Safety of any temporary and volunteer staff in its employment.

To achieve this, the Trust will provide temporary or volunteer staff with the following information prior to starting work:

- details of the qualifications and skills required to do the work safely
- the requirements of the safeguarding policy
- the risks to Health & Safety identified by workplace risk assessments
- the preventive measures to be taken
- safe working procedures
- the action to be taken in the event of an emergency
- identify what training they are expected to complete on the Trust Mandatory Training Standards

The competence of temporary and volunteer staff will be assessed to ensure they are capable of working safely.

Trainee teaching staff or student teachers are additionally required to complete the proper DBS checks and to assist with implementing the Trust's safeguarding policy during their work.

## **Training**

Training in Health & Safety is a legal requirement and also helps create competent employees at all levels within the Trust to enable them to make a far more effective contribution to Health & Safety, whether as individuals, teams or groups.

All employees will receive **induction training**.

Such training will cover:

fire procedures, warning systems, actions to be taken on receiving warning, locations of exits/escape routes, evacuation and assembly procedures, first aid/injury reporting procedures, names of first aiders/appointed persons, instruction on any prohibition areas (i.e. no smoking), issue of protective clothing/equipment and its use, instruction under COSHH, mandatory protection areas, thorough instruction applicable to their particular duties at work etc.

Training needs will be reviewed as a result of job changes, promotion, new activities or new technology, following an accident/incident and performance appraisal.

Records of training will be kept for all employees.

All Health & Safety training will be recorded on the H&S Training Tracker, this is maintained by Jemma Muncaster, office manager

Employees must:

- participate in the induction training activities they have been required to attend or carry out
- work according to the contents of any training they receive
- ask for clarification of any points they do not fully understand
- not operate hazardous plant or equipment, use hazardous chemicals or carry out any hazardous activity unless they have been appropriately trained and instructed
- complete all training assigned to them within the prescribed deadlines

## **Violence to Staff**

The Trust recognises that in certain situations violent behaviour towards staff may occur and therefore will take all reasonable measures to protect staff from violence and aggression.

We define violence and aggression as:

- actual or threatened physical assaults on staff
- psychological abuse of staff
- verbal abuse which includes shouting, swearing and gestures
- threats against employees.

All staff must familiarise themselves with any relevant risk assessments to help them prevent violence and aggression so far as possible and to help them manage it if it occurs.

If you are a witness or receive any violence or aggression towards you, then you should report this to a senior member of staff / principal so that this can be recorded and investigated. The Trust will support the decision of any employee wishing to press charges against the individual(s) involved. Access to counselling can also be provided where required.

## **Visitors**

In the interest of safety and security, the Trust will take the necessary measures to protect staff and visitors from any accidents or incidents that may occur during visiting.

Employees hosting visitors must ensure that:

- they are authorised to enter the premises or are accompanied
- they adhere to applicable Health & Safety instructions and rules during their visit
- adequate information is passed to ensure their safety including emergency information
- any protective clothing required is provided and worn
- any accidents / incidents involving visitors are reported through the accident reporting arrangements.

Employees aware of people on the premises who may be unauthorised should report these to the principal for action.

## **Emergency Action**

In the event of the fire alarm sounding, all visitors should be escorted to the assembly point by their host. Visitors should not leave the area before notifying the senior person present.

## **Window Restrictors**

The fitting and use of window restrictors within Trust premises is used to ensure the safety and security of members of staff, students and visitors. The Trust is particularly concerned with preventing persons from falling from height, and has fitted window restrictors to remove the possibility of persons opening a gap large enough for a person to fall through. It is therefore essential that all window restrictors are maintained in a good working order and that all staff report defects to their line manager as a matter of urgency.

If you discover a window restrictor that is damaged or broken you must report it to your line manager or the Site Manager. Any window restrictor that is found to be broken will be replaced or repaired as a matter of urgency, but you must ensure that you leave the window locked and do not open it until repairs are carried out. If the repair will not take place for more than a day, temporary signage should be put in place to indicate that the window should not be used.

## **Work At Height**

The Trust will take all reasonable steps to provide a safe working environment for all employees who may be affected by work at height activities.

### **Using Ladders (including stepladders)**

Ladders and stepladders should only be used for short duration tasks (less than 30 minutes), light duty tasks or where more suitable access equipment cannot be used due to existing features of the site which cannot be altered.

**Only those persons who have been trained to use ladders safely may use them.**

Prior to use it should always be ensured that the ladder is in good condition and fit for purpose.

Where ladders are to be used to work from it should be ensured that:

- a) a secure handhold and support are available at all times;
- b) the work can be completed without stretching;
- c) the ladder can be secured to prevent slipping.

***Under no circumstances should high areas be accessed using chairs, tables or such other items of furniture not designed the purpose.***

## **Work Equipment**

The Trust will provide a safe working environment in relation to work equipment safety and ensure all employees receive appropriate safety information and training in their work equipment.

Employees must

- only use work equipment for which they have received information and training for
- not undertake any maintenance work unless competent and authorised to do so
- not interfere with or remove anything which has been provided for safety reasons
- report defects immediately to their manager/supervisor
- use any personal protective equipment as required.

## **Working Time Regulations**

The Trust will ensure that all workers under their control adhere to the working time regulations.

The working time regulations are designed to limit the number of hours individuals have to work. The Trust will NOT encourage workers to work over the 48 hours but workers can choose to work longer hours if they wish by opting out. Workers cannot be forced to opt out and can revoke their opt out if they give a suitable notice period.

Individuals who are tired due to working excessive hours are more likely to suffer from mental health problems, general ill health and make mistakes leading to accidents.

A summary of the requirements for adult workers:

- a maximum of 48 hours per week, averaged out over a 17 week reference period (employees can opt out of this)
- entitlement to a minimum uninterrupted rest period of 11 hours in every 24-hour period with no opt out
- entitlement to 28 days paid holiday per year (including statutory holidays) for full time workers (pro-rata for part time workers)
- maximum of 8 hours per shift for night shift workers
- free health assessments for night shift workers
- 24 hour rest period at least once a week, can be 48 hours every fortnight with no opt out
- entitlement to a rest break, if working over six hours
- employees must not suffer any detriment if they choose not to opt out.

Travelling to and from the normal work place, break periods, rest periods, holidays and sickness do not count as working time.

The reference period of 17 weeks can be increased 26 weeks or 52 weeks by local collective agreements with recognised trade unions or official employee representatives.

A young person's maximum hours are limited to 40 hours per week with no reference period.

Young persons are generally excluded from shift working.

### **Further information**

All staff should refer to their contract of employment for full details of the Trust's policy on working times, holidays and other benefits.

## **Workplace Transport**

The Trust will take all reasonable steps to control and manage the risks from the use of workplace transport. Pedestrian and vehicle traffic will be prevented from coming into contact wherever possible, and vehicles will be controlled on site so as to pose minimal risk to each other and to persons present on site.

Employees must:

- obey all instructions regarding designated traffic routes and restricted areas whether on foot or in a vehicle
- refrain from entering or directing others into restricted areas
- adhere to Trust procedures and the directions of designated site personnel (such as banksmen) when carrying out reversing, loading and unloading, parking or similar vehicle-based activities
- complete any required competency assessments for driving
- comply with all vehicle operations procedures
- adhere to the site speed limits.

When using Trust vehicles, employees must carry out any pre-use checks and report any damage or defect to the vehicle promptly.

## HEALTH & SAFETY HANDBOOK ACKNOWLEDGEMENT FORM

Please read the notes below.

Clearly, we will do all in our power to ensure the Health & Safety and welfare of all our staff and we look to our employees to abide by the Health & Safety standards laid down.

We have formulated our Health & Safety at Work Policy as legally required and this handbook informs you of those sections of the Policy which affect you.

You should read the information contained in this Handbook and adhere to the rules at all times.

Please discuss any queries you may have with your employer.
