

Maths Teacher

At XP, we focus relentlessly on character growth and beautiful student work which results in outstanding academic progress and fantastic children. Would you like to join our team and help further the development of our great school?

XP is an internationally renowned school, hosting hundreds of visitors from across the world every year. We were awarded 'School of the Year' by the Whole Education network, and judged 'outstanding in all areas' in September 2017. To be part of our continuing school development is a once in a lifetime opportunity that should not be undervalued by any potential candidate.

"If I were to make a list of the best schools in the world, XP would be on that list.", Ron Berger, Chief Academic Officer of Expeditionary Learning, a network of over 160 schools in the USA.

We deliver our curriculum through cross-subject expeditions at all key stages. At XP, we are building a team of teachers who are strong in their trained subject and are willing to support and develop their teaching in other subjects to deliver our cross-subject learning expeditions. Most teachers have passions and expertise in subjects close to, or disparate from, their trained subject and will therefore have the opportunity to bring these wider skills into our curriculum.

We are looking for a Teacher that will be part of our Maths team. This is a fantastic chance for you to contribute to our extraordinary staff.

"Every day, for one reason or another, it is confirmation that XP is something immensely special and that I am part of a team that has embarked on a very special project that will change the future lives of children and send waves across education in the UK", Gemma Vayro, Teacher of Humanities, XP.

We are looking for great teachers, great people who want to become great teachers, and people who want to develop themselves by becoming a great teacher.

Salary is negotiable, depending on capability and experience.
