

## Skills for Life **Trust**

Everything we do in the Skills for Life Trust is based on our core vision, mission and set of fundamental values that are shared and embraced by all stakeholders of the trust. This includes our students, staff, parents, carers, local employers and communities.

### **Vision**

#### **“Preparing you for the future”**

At the Skills for Life Trust our core vision is to prepare all our young people for their next steps in life. We understand that a quality education is not just focused on academic achievement but is also built around the foundations of developing softer skills that will support personal development, employability skills and self-care.
