Students gathered at the Mildenhall Hub construction site on Friday 8th March 2019 for the first official turf cutting carried out by Matt Hancock, Health Secretary and MP for West Suffolk.

Principal, Susan Byles said: “There are few academies in the country that are purposely designed and built to be at the very centre of a community hub.

The opportunities that this will bring to the students of Mildenhall are both unique and plentiful.

Not only will our students learn in a modern, purpose built academy building but they will also have access to other amazing facilities such as a swimming pool and leisure centre.”
