

Vision

A centre where successful learning and high levels of achievement prepare children and young adults for fulfilling future lives.

Values

- The individual young person must be at the centre of all that we do
- Every student must be respected, valued and nurtured and their voice must be heard
- Learning is the key to students' future lives. We believe that successful learning comes from skilful teaching, and innovative and personalised curriculum and from a real partnership with families
- Learning should be fun. We emphasise the development of self-esteem and confidence
- Every student's achievements should be recognised and celebrated

We want our School/College to be

- A warm, welcoming community of students, parents and staff. We want to offer support and opportunities for personal growth and lifetime learning for all
- A place that prepares students for their future lives. We teach students the skills, knowledge and confidence to enable them to gain as much independence as they possibly can. We help students to make choices and provide opportunities for them to become part of a wider community
- A place where everyone is respected and where everyone works at and develops good relationships and friendships. Our school/colleges must be a safe place for learning and fun, where we support students' emotional, social and spiritual development
- A place where our students can receive an education that meets the highest expectations. We provide an exciting curriculum which meets each student where they are and provides them with challenges and opportunities for growth
