DEFINITION OF LEARNING

ISD believes learning is constructing new understandings, through experience and the acquisition of knowledge and skills. High-quality learning at ISD ...

- happens best when all participants form positive relationships, set high expectations for their learning and feel secure in taking risks.
- is most effective when participants are inquisitive, active, and engaged in authentic learning tasks that can lead to action.
- happens best when learners collaborate, evaluate their own thinking and have opportunities to act on feedback.

INTERNATIONALISM AT ISD

- is a process. Becoming international requires us to think of each other as individuals rather than as members of groups.
- offers an opportunity to create something new. It develops our minds to think critically and to continually test our assumptions.
- means demonstrating the open-mindedness, flexibility, and curiosity which enables us to appreciate not only our many differences, but also our common humanity. We strive to overcome barriers and use our gained understanding to care for each other and to cooperate for the common good.
