

# Mission and Vision Statement

The International Community School was founded in Central London in 1979 as an inclusive learning community, and our entire staff is committed to providing the best possible educational opportunities for all children. We value each student's background, culture and experience, and welcome uniqueness and diversity. Our student body is truly international with children from over 60 nationalities represented. International-mindedness is at the core of our founding principles and unites us. It is this characteristic that impacts all we do in the classroom and beyond.

## Mission:

"Our innovative approach to education inspires each and every student to discover their strengths within a community of future leaders."

## Vision:

"We aim to be a community of compassionate and inspired world citizens."
