

**Dear Friends,**

It is a privilege to lead the Educational Excellence agenda across CIS International Schools. Our family of schools continue to grow from strength to strength, retaining and attracting exceptional leaders and the best teachers from across the globe. Together, we share a passion to make a positive social impact by leading the development of education both locally and internationally.

Our international outlook, local roots and experience makes us your first choice. I see my core responsibility as growing and building upon our success by ensuring each and every student achieves their best and aspires to higher levels. CIS leadership and teaching teams are skilled, inspiring and passionate professionals, who work collaboratively to share experiences, talents and high standards.

Offering both the British and Russian curricula to our young people, our schools aim to develop and nurture well-rounded, multi-lingual students in vibrant, student centered learning environments. We are committed to building resilience and stressing the importance of well-being by offering opportunities beyond the classroom, whilst at the same time delivering exceptional academic achievement across the various schools and curriculum.
