

COMMUNITIES AND CURRICULUM

Our school is made up of three communities that put the student at the heart of everything we do.

Essella, Mabledon and the Sixth Form are each supported by a dedicated team of teachers and support staff that create an effective platform that underpins each student's progress and well-being.

While our aim of 'putting achievement first' ensures we prepare students for their exams, our curriculum is focused on delivering more general knowledge and on supporting the spiritual, cultural and moral development of the young people in our care.

In academic subjects, students are set according to ability so that we can give them the best and most appropriate support. We offer a range of exam options to cater for different interests, abilities and learning styles, with a grammar stream that allows higher-ability students to meet their aspirations and your expectations as parents.
