

Alternative Provision

EAST LANCASHIRE

Providing alternative routes to academic and vocational success for all

Our Mission

Success and achievement **for all**

As members of the Education Partnership Trust, Coal Clough Academy and The Heights Burnley work across East Lancashire. Our mission is to deliver Alternative Provision for young people, many of whom have found it difficult to be successful in a mainstream setting.

Together our schools provide a full range of academic and vocational education to re-engage pupils, and to provide the support that mainstream schools and families need to give every child the best chance of success. Our schools cater for children with any combination of circumstances and requirements.

For any child who is struggling in a mainstream school, our specialist teams will work together to understand your requirements - before creating personalised learning programmes, focused interventions, and the perfect setting to improve their confidence and self-esteem - creating successful learners, prepared for their future working lives.

Based on the historic Swindon Street site, **Coal Clough Academy** is a well-established alternative provision school for children aged 11 - 16, rated Good by Ofsted at its inspection in June 2018.

Coal Clough typically provides longer term placements for children with multiple additional needs, working to re-engage them within education, creating education healthcare plans to support SEND needs and to ensure that development continues through to further education and adulthood.

Pupils are taught in small groups, where they study the core curriculum and can receive the extra support they require. Staff ensure that learning is tailored to individual student needs, and we provide rich and varied curriculum opportunities ranging from vocational courses, academic programmes and programmes that support pupils' personal and social development.

At Key Stage 3, our focus is on supporting young people to return to a mainstream school. At Key Stage 4, our aim is for students to gain good academic attainment on par with mainstream schools, to ensure a successful transition to college, training or employment. This includes work experience opportunities for Key Stage 4 pupils, and summer school for one week during the summer holidays.

Coal Clough Academy also delivers outreach work including CPD and support sessions for our colleagues in mainstream education.

"Regular feedback and having a named person to contact aids me in ensuring that our pupils make good progress."
Commissioning School

The Heights Burnley

The Heights Burnley is an Alternative Provision School for pupils aged 5 to 16. The modern campus was purpose-built in 2019 following the demand from local head teachers. The school offers state of the art facilities with an abundance of outdoor space including our own forest school area.

The curriculum delivers a mix of vocational studies, learning outside of the classroom, personal and social development programmes, as well as the core curriculum - designed to focus on early intervention and short to medium-term stays, with the aim of reengaging pupils and preparing them for a successful return to mainstream education.

Our Nurture provision offers a focussed, short-term intervention strategy for KS1, 2 and 3 pupils. The provision benefits from small class sizes, enabling intense input from the staff and provides a safe and structured environment in which pupils are given opportunities to develop emotionally and socially.

Our curriculum at KS4 is both broad and balanced, providing students with the right courses and guidance to enable them to take the next step in their education and careers. In addition to studying qualifications in maths, English and science we also have bespoke and contemporary facilities to offer a range of high quality vocational qualifications

"We as a school are really impressed with the provision that you are offering. The communication and the work you are doing with our students is brilliant."

Commissioning School

Education Partnership Trust

The **Education Partnership Trust (EPT)** was established in 2012 as a not-for-profit multi-academy trust and approved academy sponsor. Since its creation, the Trust has grown to support schools across Lancashire, Blackburn with Darwen and Wigan

In 2015 the EPT became the sponsor of Coal Clough Academy, and in 2019 The Heights Burnley opened, to further strengthen the alternative provision offer across Burnley and Pendle. Our schools now work together to ensure that a pathway to success can be provided for every child in Burnley & Pendle - whatever their circumstances and needs.

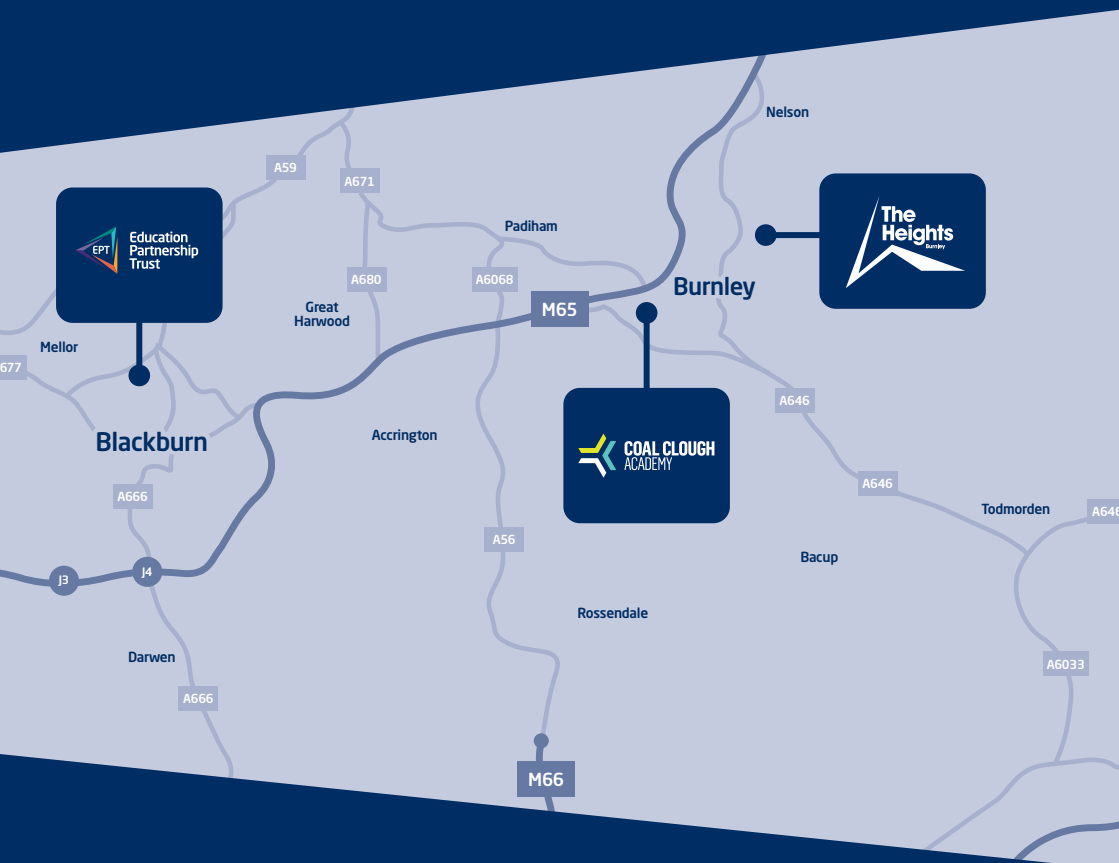

Together we are committed to ensuring that the highest quality of alternative education can be offered to students and schools across the borough.

Our vision

**Creating outstanding schools which
transform learning, lives and communities**
