SCHOOL

Dear Friends,

It is a privilege to support development of International Schools and Education Excellence agenda around the world. Our family of schools continue to grow from strength to strength, retaining and attracting exceptional leaders and the best teachers from across the globe. Together, we share a passion to make a positive social impact by making a difference through education.

As a Governing body, we have successfully established three groups of international schools worldwide: CIS Education Group with impressive 6 campuses, Discovery International School and we are now inviting you to join us in building our new Heritage Education Group with a tremendous plan of opening ten campuses in next few years.

Our international outlook, local roots and experience makes us your first choice. We see our core responsibility as growing and building upon our success by ensuring each and every student achieves their best and aspires to higher levels. Our leadership and teaching teams are skilled, inspiring and passionate professionals, who work collaboratively to share experiences, talents and high standards.

Offering both the British and Russian curricula to our young people, our schools aim to develop and nurture well-rounded, multi-lingual students in vibrant, student centered learning environments. We are committed to building resilience and stressing the importance of well-being by offering opportunities beyond the classroom, whilst at the same time delivering exceptional academic achievement across the various schools and curriculum.

Ildar Nafikov

Chairman, Board of Directors

Heritage Education Group & CIS Education Group
